National Survey of Victim Service Providers (NSVSP)

Background and Purpose

The National Survey of Victim Service Providers is a nationwide data collection effort to address major gaps in knowledge about the availability and use of services to support victims of crime or abuse. This survey asks about topics such as organization characteristics, characteristics of victims served, including the types of victimization experienced, services for victims, and staffing characteristics. The NSVSP is designed to gain a rich understanding of how VSPs are structured and resourced to provide services to victims and will gather detailed information about VSPs and the victims they serve. The data will be used to better understand the type and scope of victim services nationwide.

(NOTE: Frequently Asked Questions, Confidentiality Assurances, Burden Statement, and Important Definitions will be available in a side bar on the web survey screen)
