SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS) Transportation Security Administration (TSA) is updating and reissuing a DHS/TSA system of records notice titled, DHS/TSA–006 Correspondence Matters Tracking System Records (CMTR) (68 FR 49496, August 18, 2003).

TSA's mission is to protect the nation's transportation systems to ensure freedom of movement for people and commerce. To achieve this mission, TSA is required to develop and adapt its security programs to respond to evolving threats to transportation security. In accordance with the biennial review of this system, the following modifications are being made:

- TSA is updating the authorities for maintenance of the system.

- DHS/TSA is updating the system of records to incorporate four DHS standard routines uses. One routine use will allow release of information to appropriate agencies, entities, and persons when DHS/TSA suspects or has confirmed that the security or confidentiality of information in a system of records has been compromised. The second routine use permits the release of information to the media when there exists a legitimate public interest in disclosing information. Release under this routine use will require the approval of the Chief Privacy Officer in consultation with the counsel. The third routine use allows the release of information to a court, magistrate, administrative tribunal or opposing counsel or parties where a federal agency is a party or has an interest in the litigation or administrative proceeding. The fourth routine use allows DHS/TSA to release information to a former employee when it is necessary to consult with the former employee regarding a matter that is within that person's former area of responsibility.

- Additionally, DHS/TSA is revising a routine use that currently allows DHS/TSA to release information only to third parties during the course of an investigation related to transportation

security. The revised routine use will allow disclosure to third parties for the purposes of investigating any matter before DHS/TSA. These changes will allow DHS/TSA to thoroughly and efficiently investigate and adjudicate theft or damage claims before the agency, as well as complaints about employees. DHS/TSA is also revising a current routine use by adding indirect air carriers and other facility operators as potential recipients of information about individuals who are their employees, job applicants, or contractors, or persons to whom they issue identification credentials or grant clearances to secured areas in transportation facilities when relevant to such employment, application, contract, training or the issuance of such credentials or clearances.

DHS/TSA is removing the routine uses involving sharing with the Department of State and other Intelligence Community agencies, information relating to persons who may pose a risk to transportation or national security. Also removed as a routine use is the sharing of information with the Attorney General of the United States concerning violations of the Brady Handgun Violence Prevention Act. Both routine uses are duplicative.

- The retention and disposal section has been updated to reflect the records retention schedule approved by the National Archives and Records Administration (NARA).

- The notification section was changed to reflect that inquiries regarding whether the applicable system contains records about an individual should be directed to TSA's Freedom of Information Act (FOIA) Office.

- DHS/TSA updated the system location to reflect the current location of the system.

The CMTR system covers records associated with the management, tracking, retrieval, and response to incoming correspondence, all outgoing correspondence, memoranda, documentation, injuries, claims, and complaints associated with all subject matters over which DHS/TSA exercises jurisdiction. For example, records pertaining to individuals who make a complaint to the agency's contact center are covered by this system. DHS/TSA is revising its system of records to reflect necessary programmatic changes.

Portions of this system are exempt under 5 U.S.C. 552a(k)(1) and (k)(2) as reflected in the final rule published in the **Federal Register** on June 25, 2004 (69 FR 35536).

Consistent with the Privacy Act, information stored in the CMTR system may be shared with other DHS

components, as well as appropriate federal, state, local, tribal, foreign, or international government agencies. This sharing will only take place after DHS determines that the receiving component or agency has a need to know the information to carry out national security, law enforcement, immigration, intelligence, or other functions consistent with the routine uses set forth in this system of records notice.

II. Privacy

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a "system of records." A "system of records" is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency record keeping practices transparent, to notify individuals regarding the uses to their records are put, and to assist individuals to more easily find such files within the agency. Below is the description of the DHS/TSA-006 CMTR system system of records.
