<p>The Trends in International Mathematics and Science Study (TIMSS) is an international assessment of fourth and eighth grade students' achievement in mathematics and science. Since its inception in 1995, TIMSS has continued to assess students every 4 years, with the next TIMSS assessment, TIMSS 2019, being the seventh iteration of the study. TIMSS provides a comparison of U.S. student performance with those of their international peers in mathematics and science at grades 4 and 8. TIMSS is coordinated by the International Association for the Evaluation of Educational Achievement (IEA), an international collective of research organizations and government agencies that creates the assessment framework, assessments, and background questionnaires and provides procedures and technical standards which all countries must follow. In the U.S., the National Center for Education Statistics (NCES) conducts TIMSS. In preparation for the TIMSS 2019 main study, NCES conducted a field test in 2018 to evaluate new assessment items and background questions, to ensure practices that promote low exclusion rates, and to ensure that classroom and student sampling procedures proposed for the main study are successful. The U.S. TIMSS 2019 field test data collection was conducted from March through April 2018. The U.S. TIMSS 2019 main study recruitment began in May 2018, and data collection will be conducted from March through May 2019. The request for the TIMSS 2019 Main Study was approved in October 2018 (OMB# 1850-0695 v.14). This request is to: (a) provide an update to the final versions of the recruitment materials that will be used during the later portion of the TIMSS 2019 Main Study, and (b) provide the final U.S. Main Study questionnaires with the final U.S. adaptations to the international versions.</p>
