

MCSA-5893

Public Burden Statement

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2126-00XX. Public reporting for this collection of information is estimated to be approximately 75 minutes first year and 38 minutes subsequent years per response, including the time for reviewing instructions, gathering the data needed, and completing and reviewing the collection of information. All responses to this collection of information are voluntary. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, Federal Motor Carrier Safety Administration, MC-RRA, 1200 New Jersey Avenue, SE, Washington, D.C. 20590.

Electronic Logging Device (EDL) Vendor Registration and Certification

As described in § 395.22(a) of subpart B, motor carriers must only use ELDs that are listed on the FMCSA Web site. An ELD provider must register with FMCSA and certify each ELD model and version for that ELD to be listed on this Web site.

Registering Online

An ELD provider developing an ELD technology must register online at a secure

FMCSA Web site where the ELD provider can securely certify that its ELD is compliant with this appendix. Provider's registration must include the following information:

- (1) Company name of the technology provider/manufacturer.

- (2) Name of an individual authorized by the provider to verify that the ELD is compliant with this appendix and to certify it under section 5.2 of this appendix.

- (3) Address of the registrant.

- (4) Email address of the registrant.

(5) Telephone number of the registrant.

Certification of Conformity With FMCSA Standards

A registered ELD provider must certify that each ELD model and version has been sufficiently tested to meet the functional requirements included in this appendix under the conditions in which the ELD would be used.

Online Certification

An ELD provider registered online as described in section 5.1.1 must disclose the following information about each ELD model and version and certify that the particular ELD is compliant with the requirements of this appendix. The online process will only allow a provider to complete certification if the provider successfully discloses all of the following required information:

(6) Name of the product.

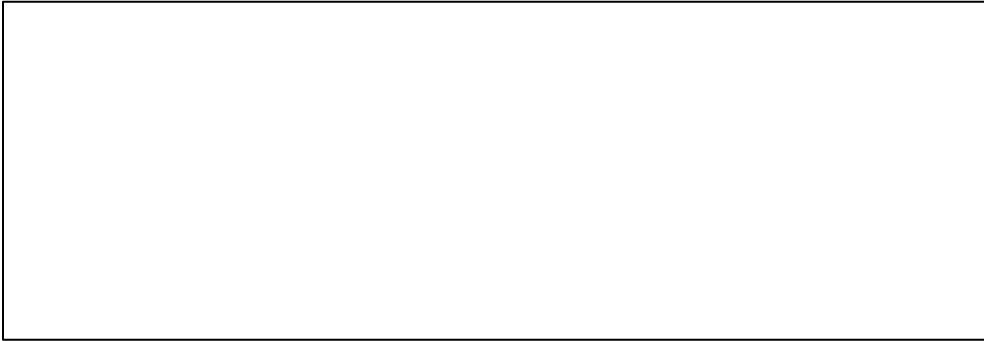

(7) Model number of the product.

(8) Software version of the product.

(9) An ELD identifier, uniquely identifying the certified model and version of the ELD, assigned by the ELD provider in accordance with 7.1.15.

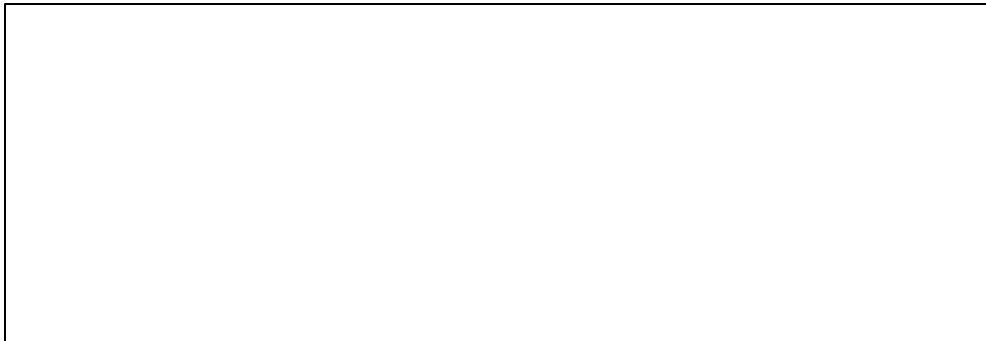

(10) Picture and/or screen shot of the product.

Paste picture here:

(11) User's manual describing how to operate the ELD.

Paste front page here:

(12) Description of the supported and certified data transfer mechanisms and step-by-step instructions for a driver to produce and transfer the ELD records to an authorized safety official.

(13) Summary description of ELD malfunctions.

(14) Procedure to validate an ELD authentication value as described in section 7.1.14.

(15) Certifying statement describing how the product was tested to comply with FMCSA regulations.

--

Keeping Information Current

The ELD provider must keep the information in section 5.1.1 current through FMCSA's Web site.

Authentication Information Distribution

FMCSA will provide a unique ELD registration ID, authentication key(s), authentication file(s), and formatting and configuration details required in this appendix to registered providers during the registration process.

Procedure to Validate an ELD's Authenticity

Section 5.2.1(9) requires that the ELD provider institute an authentication process and disclose necessary details for FMCSA systems to independently verify the ELD authentication values included in the dataset of inspected ELD outputs. The authentication value must include a hash component that only uses data elements included in the ELD dataset and datafile. ELD authentication value must meet the requirements specified in section 7.1.14.

Publicly Available Information

Except for the information listed under section 5.1.1(2), (4), and (5) and section 5.2.1(9), FMCSA will make the information in sections 5.1.1 and 5.2.1 for each certified ELD publicly available on a Web site to allow motor carriers to determine which products have been properly registered and certified as ELDs compliant with this appendix.
