OMB No. 0581-0189
Generic Fruit Package

June 2017

SC-212 Report of Special Purpose Shipments

This Justification for Change addresses cosmetic modifications to the SC-212 form currently approved under OMB No. 0581-0189, Generic Fruits. The burden is not affected.

Form SC-212 is used to report shipments of avocados diverted from the fresh marketplace to approved special purpose uses: seed, charity, and processing. The records are kept by the Avocado Administrative Committee (Committee) which oversees the Federal marketing order for avocados grown in South Florida, 7 CFR 915.

The handler fills out information about the handler, receiver and shipment. The form contains three carbon copies. The handler must sign all four copies, mail the original to the Committee, forward two carbon copies to the receiver, and keep one carbon copy for its records.

The Committee has requested a revision to the form to keep it all on one-page. To do so, AMS decreased the font size on the burden statement. This is the only change to the form. It is purely cosmetic in nature.
