BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Southeast Region Vessel Monitoring System and Related Requirements.

OMB Control Number: 0648-0544.

Form Number(s): None.

Type of Request: Regular (extension of a currently approved information collection).

Number of Respondents: 945.

Average Hours per Response: Power-down exemption requests, 5 minutes; transmission of fishing activity reports, 1 minute; and annual maintenance, 2 hours.

Burden Hours: 2,725.

Needs and Uses: This request is for an extension of a currently approved information collection.

The Magnuson-Stevens Fishery Conservation and Management Act authorizes the Gulf of Mexico Fishery Management Council (Gulf Council) and South Atlantic Fishery Management Council (South Atlantic Council) to prepare and amend fishery management plans for any fishery in Federal waters under their respective jurisdictions. NMFS and the Gulf Council manage the reef fish fishery in the Gulf of Mexico (Gulf) under the Fishery Management Plan (FMP) for Reef Fish Resources of the Gulf of Mexico. NMFS and the South Atlantic Council manage the fishery for rock shrimp in the South Atlantic under the FMP for the Shrimp Fishery in the South Atlantic Region. The vessel monitoring system (VMS)

regulations for the Gulf reef fish fishery and the South Atlantic rock shrimp fishery may be found at 50 CFR 622.28 and 622.205, respectively.

The FMPs and the implementing regulations contain several specific management areas where fishing is restricted or prohibited to protect habitat or spawning aggregations, or to control fishing pressure. Unlike size, bag, and trip limits, where the catch can be monitored on shore when a vessel returns to port, area restrictions require at-sea enforcement. However, at-sea enforcement of offshore areas is difficult due to the distance from shore and the limited number of patrol vessels, resulting in a need to improve enforceability of area fishing restrictions through remote sensing methods. In addition, all fishing gears are subject to some area fishing restrictions. Because of the sizes of these areas and the distances from shore, the effectiveness of enforcement through over flights and at-sea interception is limited. An electronic VMS allows a more effective means to monitor vessels for intrusions into restricted areas.

The VMS provides effort data and significantly aids in enforcement of areas closed to fishing. All position reports are treated in accordance with NMFS existing guidelines for confidential data. As a condition of authorized fishing for or possession of Gulf reef fish or South Atlantic rock shrimp in or from Federal waters, vessel owners or operators subject to VMS requirements must allow NMFS, the United States Coast Guard, and their authorized officers and designees, access to the vessel's position data obtained from the VMS.

Affected Public: Business or other for-profit organizations; individuals or households.

Frequency: On occasion and at least hourly for VMS.

Respondent's Obligation: Mandatory.

This information collection request may be viewed at *reginfo.gov*. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_Submission@omb.eop.gov* or fax to (202) 395-5806.

Dated: December 5, 2018.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Transshipment Requirements under the WCPFC.

OMB Control Number: 0648-0649.

Form Number(s): None.

Type of Request: Regular (extension of a currently approved information collection).

Number of Respondents: 222.

Average Hours per Response: Transshipment Report: 60 minutes; Notice for Transshipment: 15 minutes; Pre-trip Notification for Observer Placement: 1 minute; Purse Seine Discard Report: 30 minutes; Purse Seine Fishing Activity Information: 10 minutes.

Burden Hours: 2,142.

Needs and Uses: This request is for an extension of a currently approved information collection.

National Marine Fisheries Service (NMFS) has issued regulations under authority of the Western and Central Pacific Fisheries Convention Implementation Act (WCPFCIA; 16 U.S.C. 6901 *et seq.*) to carry out the obligations of the United States under the Convention on the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (Convention). The regulations include requirements for the owners and operators of U.S. vessels to: (1) Complete and submit a Pacific Transshipment Declaration form for each transshipment of highly migratory species in the area of application of the Convention (Convention Area) and each transshipment of highly migratory species caught in the Convention Area; (2) submit a notice containing specific information at least 36 hours prior to each transshipment on the high seas in the Convention Area or within 12 hours of an emergency transshipment that would otherwise be prohibited; (3) provide notice to NMFS at least 72 hours before leaving port of the need for an observer, in the event that a vessel anticipates a transshipment where an observer is required; (4) complete and submit a U.S. Purse Seine Discard form

within 48 hours after any discard; and (5) submit certain information regarding purse seine fishing activities.

The information collected from these requirements is used by NOAA and the WCPFC to help ensure compliance with domestic laws and the Commission's conservation and management measures, and are necessary in order for the United States to satisfy its obligations under the Convention.

Affected Public: Business or other for-profit organizations; individuals or households.

Frequency: On occasion.

Respondent's Obligation: Mandatory.

This information collection request may be viewed at reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to OIRA_Submission@omb.eop.gov or fax to (202) 395-5806.

Dated: December 5, 2018.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XG653

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; re-opening of public comment period.

SUMMARY: The National Marine Fisheries Service (NMFS) is announcing the re-opening of a public comment period regarding recreational fisheries in the State of Idaho. The FMEP, provided by the Idaho Department of Fish and Game (IDFG), specifies the implementation of fisheries targeting adipose-fin-clipped, hatchery-origin Snake River steelhead within the State of Idaho and in boundary waters with Oregon and Washington. On November 6, 2018, NMFS opened a 30-day public comment period on a Fishery Management and Evaluation Plan (FMEP) pursuant to the protective regulations promulgated for Pacific salmon and steelhead under the

Endangered Species Act (ESA). That comment period ended on December 6, 2018. In response to a request received from the public, NMFS intends to obtain additional information.

DATES: Comments must be received at the appropriate address or fax number (see **ADDRESSES**) no later than 5:00 p.m. Pacific time on December 13, 2018.

ADDRESSES: Written comments on the application should be addressed to the NMFS Sustainable Fisheries Division, 1201 NE Lloyd Boulevard, Suite 1100, Portland, OR 97232. Comments may be submitted by email. The mailbox address for providing email comments is: IdahoSteelheadFisheriesPlan.wcr@noaa.gov. Include in the subject line of the email comment the following identifier: Idaho's Snake River Steelhead Fisheries Plan.

FOR FURTHER INFORMATION CONTACT: Allyson Purcell, at phone number: (503) 736-4736, or via email: allyson.purcell@noaa.gov.

SUPPLEMENTARY INFORMATION:

Species Covered in This Notice

Chinook salmon (*Oncorhynchus tshawytscha*): threatened, naturally produced and artificially propagated Snake River Spring/Summer and Snake River Fall.

Steelhead (*O. mykiss*): threatened, naturally produced and artificially propagated Snake River Basin.

Sockeye salmon (*O. nerka*): endangered, naturally produced and artificially propagated Snake River.

IDFG submitted the FMEP to NMFS describing fisheries targeting adult adipose-fin-clipped, hatchery-origin steelhead within the State of Idaho and in boundary waters with Oregon and Washington. The plan was submitted under ESA limit 4 of the 4(d) Rule. These fisheries were designed to support fishing opportunities while minimizing potential risks to ESA-listed species. The FMEP describes timing, location, harvest impact limits, licensing, and gear requirements, and requires that all fish caught with an intact adipose fin be released unharmed. A variety of monitoring and evaluation is included in the FMEP.

This reopening is in place of a planned extension of the comment period. NMFS had previously considered extending the comment period by seven days, until December 13. However, extensions may only occur while the comment period is ongoing, and NMFS could not be certain that a public notice of an extension would be published before December 6. Therefore, to avoid potential confusion, we are executing a reopening of the comment

period to accept comments until December 13, so that the result is identical to the planned extension. This additional period for public comment will not affect NMFS's overall schedule for completing our ESA review.

As specified in the July 10, 2000, ESA 4(d) rule for salmon and steelhead (65 FR 42422) and updated June 28, 2005 (70 FR 37160), NMFS may approve an FMEP if it meets criteria set forth in 50 CFR 223.203(b)(4)(i)(A) through (I). Prior to final approval of an FMEP, NMFS must publish notification announcing the FMEP's availability for public review and comment.

Authority

Under section 4 of the ESA, the Secretary of Commerce is required to adopt such regulations as he deems necessary and advisable for the conservation of species listed as threatened. The ESA salmon and steelhead 4(d) rule (65 FR 42422, July 10, 2000, as updated in 70 FR 37160, June 28, 2005) specifies categories of activities that contribute to the conservation of listed salmonids and sets out the criteria for such activities. Limit 4 of the updated 4(d) rule (50 CFR 223.203(b)(4)) further provides that the prohibitions of paragraph (a) of the updated 4(d) rule (50 CFR 223.203(a)) do not apply to fisheries provided that an FMEP has been approved by NMFS to be in accordance with the salmon and steelhead 4(d) rule (65 FR 42422, July 10, 2000, as updated in 70 FR 37160, June 28, 2005).

Dated: December 6, 2018.

Donna S. Wieting,

Director, Office of Protected Resources, National Marine Fisheries Service.
