# 2018 - NOAA B-WET PD Teacher Survey

#### **Start of Block: Introduction**

Intro This is a voluntary survey. A Word version is available to review and draft responses before completing the online survey, but final responses should be submitted online through your individual link.

Please answer the following questions in reference to your recently-completed Meaningful Watershed Educational Experience (MWEE) professional development.

MWEEs are multi-stage activities that include learning both outdoors and in the classroom, and aim to increase the understanding and stewardship of watersheds and related ocean, coastal, riverine, estuarine, and Great Lakes ecosystems of all participants. MWEE professional development (PD) provides K-12 teachers opportunities for professional development to build their confidence and capacity to implement MWEE activities with their students. MWEEs for students consist of multiple components: issue definition and background research, outdoor field activities, stewardship action projects, synthesis and conclusions. In addition, MWEEs should include teacher participation for the duration of the MWEE, be integrated with classroom curriculum, use the local context for learning, consist of a set of activities over time, and incorporate NOAA assets. (For more detail see <u>MWEE Definition 2018</u>)

You will be asked about a range of practices and outcomes that represent the diversity of MWEE PD funded by the National Oceanic and Atmospheric Administration's Bay Watershed Education and Training program (NOAA B-WET), some of which may not apply directly to your experience. It is acceptable to answer "not applicable" (NA) in those instances.

Your responses will be entered anonymously and will not be associated with you as an individual. THANK YOU in advance for your candor and thoughtfulness in answering the questions. Your responses will be aggregated with other teachers' responses, and will be used by NOAA B-WET and B-WET-funded organizations to improve future professional development programs.

#### It will take about 20-30 minutes to complete this survey, depending on the nature of your professional development experience.

**Note:** On some computers, you may be able to close the survey and return at a later time to the same place as long as you use the same computer and that computer will save and retain the Qualtrics survey cookie. However, note that some work and public computers do not save and/or retain cookies. Also, it will NOT be possible to return to some sections of the survey once they have been completed. Therefore, we recommend that you complete the survey in one

sitting, if possible, to avoid issues with saving your data upon returning to the survey. You may also want to review and compose your responses in a <u>Word version of the survey</u> before completing the survey online.

If you would like to revise your response after completing the survey, please contact Bronwen Rice, B-WET National Coordinator (<u>Bronwen.Rice@noaa.gov</u>) for a new link to update your answers.

Thank you.

If you have technical issues or questions about this survey, please contact Bronwen Rice, NOAA B-WET National Coordinator, Bronwen.Rice@noaa.gov
