

Consultation and Coordination With Tribal Governments (Executive Order 13175)

The Department of the Interior strives to strengthen its government-to-government relationship with Indian Tribes through a commitment to consultation with Indian Tribes and recognition of their right to self-governance and Tribal sovereignty. We have evaluated this notice under the Department's consultation policy and under the criteria of Executive Order 13175 and have determined there to be substantial direct effects on federally recognized Tribes because the irrigation projects are located on or associated with Indian reservations. To fulfill its consultation responsibility to Tribes and Tribal organizations, BIA communicates, coordinates, and consults on a continuing basis with these entities on issues of water delivery, water availability, and costs of administration, operation, maintenance, and rehabilitation of projects that concern them. This is accomplished at the individual irrigation project by project, agency, and regional representatives, as appropriate, in accordance with local protocol and procedures. This notice is one component of our overall coordination and consultation process to provide notice to, and request comments from, these entities when we adjust irrigation assessment rates.

SUPPLEMENTARY INFORMATION: The BLM Gila District, Tucson Field Office, is issuing the Final Supplemental EIS/ Proposed RMP Amendments for the Ray Land Exchange to supplement the environmental impact analysis in the original Ray Land Exchange/RMP Amendments Final EIS completed by the BLM in 1999. ASARCO LLC (ASARCO) proposed the Ray Land Exchange with the BLM in order to acquire up to 10,976 acres of public lands and federally owned mineral estate adjacent to its Ray Complex (Ray Mine and associated processing facilities near Hayden, AZ) and in the Casa Grande, AZ vicinity (the Selected Lands). In exchange, ASARCO is offering to the BLM 7,304 acres of private lands identified by the BLM as desirable for consolidating checkerboard land ownership and improving access to existing Federal land for traditional uses such as hunting and other recreation (the Offered Lands).

Through the exchange, the BLM has an opportunity to improve resource management efficiency by disposing of heavily encumbered, isolated, and difficult-to-manage public lands; and support Secretarial Order 3373 by acquiring lands that will consolidate ownership patterns in order to improve public access and conserve important natural resources. By acquiring the Selected Lands, ASARCO is seeking to consolidate its land holdings within and near areas of ongoing mineral development and to use the Selected Lands to support current and future mining-related operations.

The Proposed Action and alternatives presented and analyzed in the Final Supplemental EIS are the same as those presented and analyzed in the 1999 Final EIS. The Final Supplemental EIS supplements the 1999 Final EIS by providing clarifying analysis of potential environmental impacts of the land exchange and alternatives. Specifically, the Final Supplemental EIS analyzes and compares the effects of the land exchange on the foreseeable mining operations conducted on Federal lands under BLM regulations (the No Action Alternative) with the effects of the land exchange on the foreseeable mining operations conducted all or
