## DEPARTMENT OF HOMELAND SECURITY

### Transportation Security Administration

[Docket No. TSA-2004-17131]

#### Intent To Request Extension From OMB of One Current Public Collection of Information: Aircraft Repair Station Security

**AGENCY:** Transportation Security Administration, DHS.

**ACTION:** 60-Day notice.

**SUMMARY:** The Transportation Security Administration (TSA) invites public comment on one currently approved Information Collection Request (ICR), Office of Management and Budget (OMB) control number 1652-0060, abstracted below that we will submit to OMB for an extension in compliance with the Paperwork Reduction Act (PRA). The ICR describes the nature of the information collection and its expected burden. The collection involves recordkeeping requirements and petitions for reconsideration by owners and/or operators of repair stations certificated by the Federal Aviation Administration (FAA).

**DATES:** Send your comments by September 4, 2018.

**ADDRESSES:** Comments may be emailed to [TSAPRA@tsa.dhs.gov](mailto:TSAPRA@tsa.dhs.gov) or delivered to the TSA PRA Officer, Information Technology (IT), TSA-11, Transportation Security Administration, 601 South 12th Street, Arlington, VA 20598-6011.

**FOR FURTHER INFORMATION CONTACT:** Christina A. Walsh at the above address, or by telephone (571) 227-2062.

#### SUPPLEMENTARY INFORMATION:

##### Comments Invited

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The ICR documentation will be available at <http://www.reginfo.gov> upon its submission to OMB. Therefore, in preparation for OMB review and approval of the following information collection, TSA is soliciting comments to—

(1) Evaluate whether the proposed information requirement is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Consistent with the requirements of Executive Order (E.O.) 13771, Reducing Regulation and Controlling Regulatory Costs, and E.O. 13777, Enforcing the Regulatory Reform Agenda, TSA is also requesting comments on the extent to which this request for information could be modified to reduce the burden on respondents.

#### Information Collection Requirement

*OMB Control Number 1652-0060; Aircraft Repair Station Security.* In accordance with 49 U.S.C. 44924 and 49 CFR part 1554, TSA performs security reviews and audits of aircraft repair stations located within and outside of the United States.

On December 12, 2003, the President of the United States signed into law the Vision 100 Century of Aviation Reauthorization Act (the Act). Section 611 of the Act requires the Department of Homeland Security (DHS) to ensure the security of aircraft repair stations. The Act further requires a security review and audit of repair stations located outside the United States, with a 145-certificate issued by the FAA. TSA, on behalf of DHS, is the agency to conduct the relevant tasks associated with this legislation. In response to the Act, TSA published a final rule setting forth the new requirements. See 79 FR 2119 (January 13, 2014).

Repair stations certificated by the FAA under part 145 and located on or adjacent to an airport, as defined in 49 CFR 1554.101(a)(1) and (2), are required to implement security requirements. Unless located on a military installation, these repair stations are subject to inspection by TSA.

The required security measures include designating a TSA point of contact and preventing the operation of unattended large aircraft that are capable of flight. A repair station owner or operator also is responsible for maintaining updated employment history records to demonstrate compliance with the regulatory

requirements. These records must be made available to TSA upon request. If TSA discovers security deficiencies, a repair station may be subject to suspension or, in extreme cases, withdrawal of its certification by the FAA if such deficiencies are not corrected. A repair station owner or operator may petition for reconsideration (appeal) of a determination by TSA that FAA must suspend or revoke its certificate. TSA uses the collected information to determine compliance with the security measures required under 49 CFR part 1554.

The respondents to this information collection are the owners and/or operators of repair stations certificated by the FAA under 14 CFR part 145, which is estimated to be 4,013 aircraft repair stations located in the United States and 874 repair stations located outside the United States.

Respondent repair stations are required to submit and update Security point of contact (POC) information, respond to requests to inspect documentation, and may petition for reconsideration. For these activities, TSA estimates that all respondent repair stations will incur a total of 1,176 hours annually to satisfy the collection requirements.

Dated: June 28, 2018.

Consistent with the requirements of Executive Order (E.O.) 13771, Reducing Regulation and Controlling Regulatory Costs, and E.O. 13777, Enforcing the Regulatory Reform Agenda, TSA is also requesting comments on the extent to which this request for information could be modified to reduce the burden on respondents.

**Information Collection Requirement**

*OMB Control Number 1652-0013; Aviation Security Customer Satisfaction Performance Measurement Passenger Survey.* TSA, with OMB's approval, has conducted surveys of passengers at airports nationwide and now seeks approval to continue this effort. The

surveys are administered using an intercept methodology. The intercept methodology uses TSA personnel who are not in uniform to hand deliver business card style forms to passengers immediately following the passenger's experience with TSA's checkpoint security functions. Passengers are invited, though not required, to complete and return the survey using either an online portal or by responding in writing to the survey questions on the customer satisfaction card and depositing the card in a drop-box at the airport or using U.S. mail. Prior to each survey collection at an airport, TSA personnel select the method by which all passengers surveyed on that particular occasion will be asked to complete and return the survey. TSA uses the intercept methodology to randomly select passengers to complete the survey in an effort to gain survey data representative of all passenger demographics—including passengers who—

- Travel on weekdays or weekends;
- Travel in the morning, mid-day, or evening;
- Pass through each of the different security screening locations in the airport;
- Are subject to more intensive screening of their baggage or person; and
- Experience different volume conditions and wait times as they proceed through the security checkpoints.

Each survey includes 10 to 15 questions, and each question promotes a quality response so that TSA can identify areas in need of improvement. All questions concern aspects of the passenger's security screening experience.

TSA collects this information in order to continue to assess customer satisfaction in an effort to manage TSA employee performance more efficiently. OMB has previously approved a total of 82 questions from which the 10 to 15 questions are selected. TSA is requesting an extension of the approval for the information collection.

TSA personnel have the capability to conduct this survey at 25 airports each year. Based on prior survey data and research, TSA estimates 384 responses from the passengers at each airport. The average number of respondents is estimated to be 9,600 per year (384 passengers × 25 airports). TSA estimates that the time it takes to complete the survey either online or by writing on the form ranges from 3 to 7 minutes, with an average of 5 minutes (0.083 hours) per respondent. Therefore, the annual

burden is 800 hours (9,600 responses × 0.083 hours).

Dated: June 28, 2018.

**HEARTH Act Approval of San Manuel Band of Mission Indians, California Business Site Leasing Code**

**AGENCY:** Bureau of Indian Affairs, Interior.

**ACTION:** Notice.

**SUMMARY:** On June 11, 2018, the Bureau of Indian Affairs (BIA) approved the San Manuel Band of Mission Indians, California, leasing regulations under the HEARTH Act. With this approval, the Band is authorized to enter into business leases without BIA approval.

**FOR FURTHER INFORMATION CONTACT:** Sharlene Round Face, Bureau of Indian Affairs, Division of Real Estate Services, 1849 C Street, NW, MS-4642-MIB, Washington, DC 20240, at (202) 208-3615.

**SUPPLEMENTARY INFORMATION:**

**I. Summary of the HEARTH Act**

The HEARTH (Helping Expedite and Advance Responsible Tribal Homeownership) Act of 2012 (the Act) makes a voluntary, alternative land leasing process available to Tribes, by amending the Indian Long-Term Leasing Act of 1955, 25 U.S.C. 415. The Act authorizes Tribes to negotiate and enter into agricultural and business leases of Tribal trust lands with a primary term of 25 years, and up to two renewal terms of 25 years each, without the approval of the Secretary of the Interior. The Act also authorizes Tribes to enter into leases for residential, recreational, religious or educational purposes for a primary term of up to 75 years without the approval of the Secretary. Participating Tribes develop Tribal leasing regulations, including an environmental review process, and then must obtain the Secretary's approval of those regulations prior to entering into leases. The Act requires the Secretary to approve Tribal regulations if the Tribal regulations are consistent with the Department's leasing regulations at 25 CFR part 162 and provide for an
