How to Use This Questionnaire

The 2018 Commercial Buildings Energy Consumption Survey (CBECS) is programmed and conducted in computer-assisted interview software called Blaise.

The 2018 CBECS is offered in two different modes: interviewer-administered and web. For the interviewer-assisted mode, a professional interviewer administers the questionnaire in-person with a respondent at the building using a Surface Pro tablet computer. For the web version, the respondent is provided with a URL and a PIN and completes the questionnaire on their own.

The purpose of this paper representation of the questionnaire is to document the question text, fills, and skip patterns within the 2018 CBECS questionnaire. *PLEASE NOTE:* All the question fills and skip patterns are handled automatically by the software and are transparent to the interviewer, so this document appears much more complex than the actual CBECS instrument.

Here is an example question to show the general question format of this document:

A11	Cool roof materials {CoolRoof} <i>see below</i>	
ASK	IF Building or Mall interview	
QUESTION TEXT - interviewer-administered		
Show Card	SHOW CARD A4	
Question Text	Please look at Show Card A4. Some roofs are designed to reflect more sunlight or absorb less heat than a standard roof. Which special qualities, if any, describe the roof of this building?	
Interviewer Instructions	Enter all that apply	
QUESTION TEXT - web		
Question Text	Some roofs are designed to reflect more sunlight or absorb less heat than a standard roof. Which special qualities, if any, describe the roof of this building?	
Respondent Instructions	Please select all that apply.	
ITEM TYPE	X Enumerated • Numeric • String Text • Date	
RESPONSE OPTIONS		
<i>Enumerated</i>		
Response options	Image	SAS Name
1. White or highly reflective coating or paint		CPCLRF
2. White or highly reflective tiles or shingles		TSCLRF
3. Aluminum coating		ALCLRF
4. Ballasted roof system		BLCLRF
5. Vegetated roof		VGCLRF
6. Other		OTCLRF
7. None		
NONRESPONSE	• Explicit DK • Explicit RF X Missing Item Prompt Box • Allow Blank	
NEXT	IF Other selected → A12 [Other cool roof] OTHERWISE → A13 [Roof tilt]	

In the first row, the black box (**A11** here) contains the question number, followed by the **Question name** (**Cool roof materials** here), the internal **Blaise programming variable** in brackets ({CoolRoof} here) and the **SAS variable** (if applicable) in the same row. If the SAS variable area says “see below,” (as it does in this example) the variables are found within the RESPONSE OPTIONS box.

The **ASK** line describes the conditions that need to be true for a question to be on path for the interview.

As shown in the next example below, sometimes there is a **FILL** line that describes any question fills and the conditions under which each appears.

The **QUESTION TEXT - interviewer-administered** box provides information about the question in interviewer-assisted mode. The **Show Card** box shows which Show Card, if any, is applicable for the question, and if so, text reading SHOW CARD A4 (e.g.) will display above the question on the screen. Show Cards allow respondents completing the interviewer-administered questionnaire to see the full list of response options (as well as definitions, examples, or images, where applicable) that are displayed on screen for web respondents. The **Question text** box shows the question to be displayed and the **Interviewer Instructions** box shows the text that will be displayed below the question in italics (or N/A if there are no instructions for the particular question).

The **QUESTION TEXT - web** box provides information about the question in web mode. There are no Show Cards for the web, so that box is not there. The **Question text** box shows the question to be displayed if it’s different from the interviewer-assisted mode (or “No changes required” if it is the same). The **Respondent Instructions** show the text that will be displayed below the question in italics.

The **ITEM TYPE** box shows an **X** for whether the question is Enumerated, Numeric, String Text, or a Date. Each of these types then provides different information, as follows:

RESPONSE OPTIONS: Enumerated shows the response set for the question, the associated **Image** to be shown on the screen, if applicable (not many questions have images), and the **SAS Name**, if applicable.

RESPONSE OPTIONS: Numeric shows the response set for the question, the **Watermark** shows the text that will be displayed within the data entry box before the interviewer or respondent begins typing, the **Label** that will be displayed directly to the right of the data entry box, and the allowable **Range** of data.

RESPONSE OPTIONS: String Text are mostly used for “other specify” responses. The **Watermark** shows the text that that will be displayed within the data entry box before the interviewer or respondent begins typing.

RESPONSE OPTIONS
<i>String Text</i>
Watermark
Briefly describe the other activity associated with this gas station

RESPONSE OPTIONS: Date all show a **Watermark** of mm/dd/yyyy.

The **NONRESPONSE** box shows how the interviewer or respondent will proceed if they do not know the answer to the question. **Explicit DK** and **Explicit RF** mean that there will be a radio button or check box directly on the screen that says “I don’t know” or “I’d rather not answer.” **Missing Item Prompt Box** means that if the interviewer or respondent leaves the question blank, a message will appear that says “Did you mean to leave this question blank? If not, please provide an answer and select the “Next” button. Otherwise, select “Next” to skip the question.” **Allow Blank** means that a question can be left blank without the missing item prompt box appearing.

The **NEXT** line details the routing for the next question. Follow these instructions in order. Once a true statement is reached, go to the question indicated by the arrow (⇒).

Example of **Numeric** response option:

A18	Floor-to-ceiling height {FloorToCeiling} <i>FLCEILHT</i>	
ASK	IF Building or Mall interview	
FILL	{Floors} IF A16 [Number of floors] = 1 = "in this building" OTHERWISE = "of the majority of floors in this building"

ITEM TYPE	<input checked="" type="checkbox"/> Enumerated <input type="checkbox"/> Numeric <input type="checkbox"/> String Text <input type="checkbox"/> Date	
RESPONSE OPTIONS		
<i>Enumerated</i>		
Response options	Tooltip text	
11. Office/Professional	Examples: administration; bank; brokerage/securities firm; consulting; government; insurance; law; mixed professional; non-profit; real estate; research and development; sales or leasing.	
12. Data center	A data center is a group of networked computer servers that are housed in one location, usually a secure area. The servers perform functions such as data storage and processing. There are usually many servers stacked in rows of racks and they operate continuously, day and night. Data centers are generally kept very cool and require a dedicated uninterruptible power supply.	
13. Warehouse/Storage	Includes non-refrigerated and refrigerated warehouses, distribution or shipping centers, other storage buildings, and public rental storage units.	
14. Food sales or service	Examples: grocery store/supermarket; convenience store; restaurant; fast food; cafeteria; caterer; bar; enclosed farmer's market; fruit/vegetable market; meat/seafood store; specialty food store; sandwich shop; coffee shop.	
15. Enclosed mall	An enclosed shopping mall contains multiple stores and other establishments, often anchored by one or more department stores, with interior walkways and common areas.	
16. Retail (other than mall)	Examples: big-box chain store; department store; wholesale club; clothing store; home improvement/gardening/building supplies; automobile dealer/showroom; hardware store; drugstore; furniture/appliances; car rental; equipment rental; alcoholic beverage store; antique shop; pawn shop; bookstore.	
17. Education	Buildings for academic or technical <u>classroom</u> instruction. Other activities that occur on school campuses (e.g., gyms, dormitories, libraries) should be reported in their respective categories. Examples of <u>classroom education</u> : preschool/daycare, elementary school,	

	middle/junior high school, high school, college/university classroom, vocational school/career training, religious education.
18. Religious worship	Examples: chapel; church; mosque; synagogue; temple.

19. Public assembly	Buildings where people gather for entertainment, cultural, recreational, or social activities. Examples: art gallery; exhibit hall; library; museum; casino; concert hall; night club; observatory/planetarium; stadium/arena/coliseum; theater/cinema; amusement arcade; bowling alley; community center; gymnasium/health club; indoor racquet sports; recreation center; indoor swimming pool; skating rink; assembly hall/auditorium; convention center; funeral home; lecture hall; lodge hall; meeting hall; student union; senior center; town hall; armory; airport terminal; train/bus station.
20. Health care	Includes both inpatient (services involving overnight care) and outpatient services. Examples: medical care hospital; psychiatric hospital; substance abuse rehabilitation center; veterinary facilities; physical therapy center; dental clinic/office; medical clinic/office; mental health/psychiatric clinic; urgent care clinic; women's health clinic.
21. Service	Examples: motor vehicle repair or service; other repair or maintenance shop; dry cleaner; laundry; car wash; gas station; barber shop; salon/spa; animal shelter; kennel; doggie daycare; copy center/printing; post office/shipping center/mailbox facility.
22. Lodging	Buildings that offer group quarters for short-term or long-term residents. Examples: hotel; motel; inn/bed and breakfast; dormitory/sorority/fraternity; retirement home; nursing home; shelter/group home/children's home; halfway house; convent/monastery.
23. Public order and safety	Examples: fire station; police station; courthouse/probation office; jail/penitentiary/prison; reformatory; sheriff's office.
24. Residential	Living quarters for one or more households with individual kitchen facilities. Examples: apartment building; single family detached home; duplex; townhouse; row house; mobile home.
25. Industrial/Manufacturing	Buildings that involve the processing or procurement of goods, merchandise, raw materials or food. Examples: assembly factory; construction or natural resource procurement; food processing; manufacturing plant; mill; paper, chemical, rubber or petroleum processing; utility or sanitary service.
26. Agricultural	Buildings that involve the production, processing, sale, storage or housing of agricultural products, including livestock. Examples: greenhouse; livestock housing; nursery; grain storage.
27. Vacant	Buildings that were vacant during 2018, but were previously used for commercial purposes.
28. Other	Examples: laboratory; airplane hangar; public restroom/locker room/changing area; crematorium; enclosed parking garage; telephone switching facilities; broadcasting studio.
