Purpose: This communication serves two purposes: 1) To inform the National Materials, Program (NMP) community (Agreement States and U.S. Nuclear Regulatory Commission, (NRC)) that the above indicated Office Of Nuclear Material Safety And Safeguards (NMSS) State Agreements (SA) procedures have been approved for use as interim procedures; and 2) To provide the NMP community an opportunity to comment on the these interim procedures.

Background: On July 24, 2019, the NRC approved and issued the revised Management Directive (MD) 5.6 "Integrated Materials Performance Evaluation Program (IMPEP)." In September 2019, 11 working groups consisting of Agreement State and NRC representatives with IMPEP experience were formed to revise NMSS SA procedures used to implement the MD and IMPEP. To fully implement the revised MD 5.6 in a timely manner, the revision of these procedures is being completed simultaneously. These 11 working groups will ultimately revise 14 NMSS SA procedures. The charter for the working groups can be found in the Agencywide Document Access and Management System at Accession number ML19274C608. A list of all procedures included in this effort and co-chairs can be found in the charter.

Discussion: This letter notifies the NMP community that NMSS SA procedures SA-101, SA-102, SA-103, SA-105, SA-106, SA-108, SA-109, and SA-110 have been revised and issued for use on an interim basis until July 31, 2020, to allow NRC and Agreement State staff in the NMP community to provide comments¹ based on their review of the procedure, or implementation
