Preventive Health and Health Services Block Grant Assessment

Thank you for participating in the Centers for Disease Control and Prevention's (CDC's) assessment of the Preventive Health and Health Services (PHHS) Block Grant. Your participation will help CDC gather important information regarding results and improvements achieved by the PHHS Block Grant from July 1, 2018, through June 30, 2019.

Completing the questionnaire is voluntary and will take approximately **45** minutes.

Instructions

To advance through the questionnaire, please use the Forward (>>) and Back (<<) buttons located in the lower-right corner of each page. Please note that you do not have to complete the questionnaire in one sitting. The data you enter are automatically saved as you progress to each new section, therefore you may stop and return at a later time if needed. You will also have an opportunity to review and print your responses before submitting. **Your response to the questionnaire is due on XX/XX/2019.**

Throughout the questionnaire, key terms appear in *underlined, italicized* font. If you hover over a key term with your mouse/pointer, the term's definition will appear in a text box.

Technical Support

For technical support on completing and submitting the questionnaire, please contact Paris Harper-Hardy (pharper-hardy@astho.org / 571-527-3162).

For other questions about this questionnaire, please contact the PHHS Block Grant Evaluation Team at phhsblockgranteval@cdc.gov.

Use of the Findings from the Assessment

The findings from this assessment will be used to inform CDC of the outputs and cross-cutting outcomes of the PHHS Block Grant, refine existing measures, and/or inform the development of future measures. No personally identifiable information will be collected. Responses will be kept secure and results will be reported only in aggregate form. Findings will be shared with various stakeholders, including grantees, and might be included in articles and reports that will be made available publicly.

Public reporting burden of this collection of information is estimated to average 45 minutes per response, including the time for reviewing, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (XXXX-XXXX).

II. Public Health Infrastructure

Public health infrastructure includes the organizational capacity (i.e., the systems, workforce, partnerships, and resources) that enables agencies to perform their core functions and provide essential services. Improvements to infrastructure may occur within the grantee health department, either department-wide or within a specific program, or across the grantee jurisdiction's public health system.

This section includes questions related to *measure 1.1* and *measure 1.2*, which are focused on two aspects of public health infrastructure respectively: 1) information systems capacity improvement and 2) quality improvement.

Screen 4
