Privacy Impact Assessment Form v 1.47.4 Status Draft F-51337 5/2/2017 9:32:11 AM Form Number Form Date Question Answer OPDIV: CDC PIA Unique Identifier: P-2367956-084553 2a Name: Traumatic Brain Injury Surveillance System (TBISS) General Support System (GSS) Major Application Minor Application (stand-alone) The subject of this PIA is which of the following? Minor Application (child) C Electronic Information Collection ○ Unknown Identify the Enterprise Performance Lifecycle Phase Implementation of the system. ○ Yes 3b Is this a FISMA-Reportable system? No Does the system include a Website or online Yes application available to and for the use of the general \bigcirc No public? Agency Identify the operator. Contractor **POC Title** Epidemiologist **POC Name** Bethany West POC Organization | ONDIEH/NCIPC/DUIP Point of Contact (POC): **POC Email** hzv5@cdc.gov **POC Phone** 770.488.0602 New Is this a new or existing system? Existing Yes Does the system have Security Authorization (SA)? No May 30, 2017 8b Planned Date of Security Authorization ☐ Not Applicable

The Traumatic Brain Injury Surveillance System (TBISS) is being implemented as a means to accurately determine how many children and adults experience a traumatic brain injury (TBI) each year in the United States, to collect information about the 11 Describe the purpose of the system. circumstances of the TBI, and to identify groups most at risk for TBI. By administering the surveillance system over time, the surveillance system can monitor trends and allow for an understanding of whether TBIs are increasing or decreasing, and whether prevention efforts are effective. Describe the type of information the system will The data collected will include first names, phone numbers collect, maintain (store), or share. (Subsequent and email addresses, as well as information from the questions will identify if this information is PII and ask respondents regarding their experiences with TBI. about the specific data elements.) The TBI surveillance system is a computer-assisted and web interviewing platform for data analysis and sample processing. The system will be used to accurately determine how many children and adults experience a TBI each year in the United States, to collect information about the circumstances of the injury, and to identify groups most at risk for TBI. By administering this survey, the system will be able to monitor trends and show if TBIs are increasing, decreasing, and Provide an overview of the system and describe the whether prevention efforts are effective. information it will collect, maintain (store), or share, either permanently or temporarily. The data collected will include first names, phone numbers, and email addresses, as well as information from the respondents regarding their experiences with TBI. The data will be collected by Computer-Assisted Telephone Interview (CATI) and Web Interview (CAWI). The raw data will not be exported outside the system. Summary analyses of trends and statistics, which do not contain PII, will be sent to the CDC. The TBI surveillance system will collect and or store, but not share, phone numbers, names, and email addresses. Yes 14 Does the system collect, maintain, use or share PII? ○ No

| | | Social Security Number | ☐ Date of Birth | |

| 23a | Identify the OMB information collection approval number and expiration date. | Submitted but still pending. | |
| 24 | Is the PII shared with other organizations? | ○ Yes | |
| 25 | Describe the process in place to notify individuals that their personal information will be collected. If no prior notice is given, explain the reason. | A disclosure notification will be part of the script read to adult respondents. The preference is for the adolescent respondent to complete their own survey at the time of the initial survey with their parent. If the adolescent is not available, the script will ask the parent/guardian on the phone for a cell phone number and email address for the 13-17 year old. Only after obtaining permission from the parent, will interviewers record the contact information for the adolescent in the household. | |
| 26 | Is the submission of PII by individuals voluntary or mandatory? | VoluntaryMandatory | |
| 27 | Describe the method for individuals to opt-out of the collection or use of their PII. If there is no option to object to the information collection, provide a reason. | Respondents can refuse to answer any question that they do not want to answer. Additionally, we will collect recontact information for adolescents only after a parent/guardian gives consent for their child to participate in the survey. Only after obtaining permission from the parent, will interviewers record the contact information for the adolescent in the household. Further, even if the parent consents, the child can still refuse to provide assent, and can likewise decline to answer any question he or she does not want to answer. | |

| 28 | the time of original collection). Alternatively, describe why they cannot be notified or have their consent obtained. | | notified if there are any major changes to maintained within the system. |

| 30 | PII contained in the system to ensure the data's integrity, availability, accuracy and relevancy. If no | compares the PII con | dministrator periodically reviews and atained in the system against the ase to ensure the data's integrity, and relevancy. |
| | Identify who will have access to the PII in the system and the reason why they require access. | □ Users | The users will have access only to their own information when submitting responses to the survey. |
| | | | Server Administrators and Domain Administrators have full local admin access to all servers, as required to support the systems and administer other server and domain user privileges, as well as support database application and backup process. |
| | | ☐ Developers | |
| | | Contractors | |
| | | ⊠ Others | Data Analysts require access to process and analyze the data and to upload list data to the dialer. Telephone Interviewers will need to enter the data into the collection system, but will have access only to one respondent's replies at a time, and only while on the phone with the respondent. Supervisors over the telephone interviewers are able to listen to interviews for quality control (QC) purposes. |
| 32 | System users (administrators, developers, | Role Based Access Control (RBAC) is used to determine who has access to PII. | |
| 33 | access to PII to only access the minimum amount of | The Least Privilege model is utilized allow those with access to PII to only access the minimum amount of information necessary to perform their job. | |

| 34 | Identify training and awareness provided to personnel (system owners, managers, operators, contractors and/or program managers) using the system to make them aware of their responsibilities for protecting the information being collected and maintained. | All project staff are required to take annual training in cybersecurity, security awareness, privacy training, and Ethics training. This training has been reviewed and is compatible with CDC requirements and in accordance with contractual agreement. | |
|-----|--|--|--|
| 35 | Describe training system users receive (above and beyond general security and privacy awareness training). | All project staff receive system specific training on system use. This training has been reviewed and is compatible with CDC requirements. | |
| 36 | Do contracts include Federal Acquisition Regulation and other appropriate clauses ensuring adherence to privacy provisions and practices? | YesNo | |
| 37 | Describe the process and guidelines in place with regard to the retention and destruction of PII. Cite specific records retention schedules. | Records are retained and disposed of in accordance with the CDC Records Control Schedule and in accordance with contractual agreement. Record copy of study reports are maintained in agency from two to three years in accordance with retention schedules. Source documents for computer are disposed of when no longer needed by program officials. Personal identifiers may be deleted from records when no longer needed in the study as determined by the system manager, and as provided in the signed consent form, as appropriate. Disposal methods include erasing computer tapes, burning or shredding paper materials or transferring records to the Federal Records Center when no longer needed for evaluation and analysis. Records are retained for 20 years; for longer periods if further study is needed. (Record Schedule N1-442-09-1) | |
| 38 | Describe, briefly but with specificity, how the PII will be secured in the system using administrative, technical, and physical controls. | Administrative controls include a system security plan, contingency plan, regular back up of files and storage of backups off site, role-based security awareness training, least privilege access enforced through Active Directory groups, separate user and privileged accounts for administrators, policies and procedures in place for retention and destruction of PII, and a corporate incident response team and incident response plans. Technical controls include identification and authentication using unique user IDs, passwords, and smart cards, use of firewalls and intrusion detection/prevention systems, virus scanning software on all computers, and a SIEM solution. Physical controls include guards, identification badges, key cards, and closed circuit TV. | |
