CDC Worksite Health ScoreCard Pilot Evaluation

Public reporting of this collection of information is estimated to average 5 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-XXXX).

Introduction

Johns Hopkins University, in collaboration with the Centers for Disease Control and Prevention (CDC), is asking your worksite to volunteer for a research study that will examine the reliability and validity of the CDC Worksite Health ScoreCard (HSC) survey tool in order to further refine this tool before it is released to the general public. The HSC instrument was developed by the CDC to help businesses evaluate their health promotion programs, policies, and environmental supports for preventing heart disease, stroke, and related conditions. The HSC will also provide businesses with customized feedback on high-impact interventions that they can implement to promote a healthy and productive workforce.

Informed consent

Before we get started, we'd like to give you some more information to help you decide

Before we get started, we'd like to give you some more information to help you decide whether or not you would like to participate.

- Your participation is voluntary. In the course of this discussion, you may refuse to answer specific questions. You may also choose to end the discussion at any time.
- The discussion is designed to take approximately 5 minutes.
- All of the comments you provide will be maintained in a secure manner. We will not attribute your responses to you or your organization without your permission unless we are compelled by law.
- There are no right or wrong answers or ideas—we want to hear about YOUR experiences and opinions.
- CDC is authorized to collect information for this project under the Public Health Services Act.
- There are no risks or benefits to you personally for participating in this discussion.
- We are interested in your comments so that we can improve the CDC Worksite Health ScoreCard for future participants. Please feel free to contact Dr. Enid Roemer at Johns Hopkins University. Her phone number is 202-817-3743 and her email is eroemer1@jhu.edu.

Both consent boxes must be checked in order to proceed:

Yes, I am willing to be part of this study.

Yes, I agree not to disclose or distribute the contents of the updated CDC Worksite HealthScoreCard (currently in draft form) beyond appropriate use in The CDC Worksite HealthScoreCard Validation Project (HSC Project), and will not copy or paste contents into other documents. The Centers for Disease Control and Prevention (CDC) have granted me permission to complete the HSC tool in order to provide feedback that will help refine the tool, which has not yet been fully validated and published.

Signature (required):

These questions will follow the CDC Worksite Health ScoreCard for the first 200 respondents recruited to complete the updated tool. They are intended to gather general feedback and determine if any additional refinements are necessary to improve question clarity.

1. What were your impressions of this update to the HSC?

2. Are there any questions that you did not understand (e.g., because the wording was confusing)?

3. Are there any questions that were challenging to answer for other reasons?

4. Did you generally read the explanatory subtext included with questions?

Yes

No

If so, did you find these examples or clarifications helpful?
