

## REQUEST FOR DETERMINATION OF RESEARCH STATUS

To be completed by the staff member with lead responsibility for the project and approved by branch chief (if applicable) and Division ADS. A separate PGO funding memo is required if project is research and involves human subjects regardless of the CDC staff role.

**Instructions:** 

- (1) Use this form to declare: (a) the research status of any project, (b) role or roles of CDC staff
- (2) A short summary should be attached offering specific details about the project and the role of staff.
- (3) Be sure to complete all applicable items, obtain appropriate signatures and submit this form for approval.

6.4.2			information recorded in such a manner by the investigator that the subjects cannot be or indirectly through identifiers linked to the subjects?				
	(Note: If a link is created by an investigator even temporarily, for research purposes, this criterion is not met. If a temporary link is created by clinical staff who already have access to the data, this criterion is met).						
	[]	YES	(there are no identifying information and no unique identifiers or codes)YES				
	г 1	NO	(there are identifiers (including codes))				

- Please prepare and attach a short summary paragraph (<1 page); if this is new:
  - a. Be sure to include the purpose of the project, specific details about the project and the role of the CDC staff member (s) in the project. In explaining one's role as a consultant be particularly careful to identify involvement in things like: study design decisions, oversight of protocol development, participation in review of data collection procedures, and participation in data analysis and/or manuscript preparation, as well as whether there will be access to identifiable or personal data.
  - b. Explain your project status selection (research--non-exempt, exempt, no CDC investigator or not involving human subjects; public health practice). If you selected research not involving human subjects be sure to indicate if the data includes any personal information (e.g., name, SSN), linkable study identification numbers or codes, or geographical information.

NCCDPHP plans to evaluate the first ever implementation of Stanford University's Chronic Disease Self-Management Program (CDSMP) in the US Affiliated Pacific Islands (USAPIs).

The purpose of the evaluation is to understand how CDSMP is being implemented in the region, to identify barriers and facilitators to implementation, to monitor fidelity to Stanford University's model and document adaptations to the curriculum, and to understand the self-reported effects of the program on program participants.

Two data collection instruments will be used. The CDSMP Workshop Evaluation Form will be administered at the end of the 6 week workshop, by CDSMP leaders, to assess participant satisfaction. The CDSMP Questionnaire will be administered by CDSMP leaders and is a pre/post test to assess symptoms and health behaviors at the beginning and end of the CDSMP workshop. This is public health practice and the evaluation findings will be used to improve CDSMP implementation in the region. The CDC project officer will oversee the project.

8. Please list the primary project site and all collaborating site(s).

**Explanation of project components:** 

9. If project involves research that is funded extramurally, list amount of award that should be restricted pending IRB approval and describe which project components will be affected, if known:
