**UES System CCB Items Status:** A list of all suggested improvements applicable to participant users that have been or are soon to be considered by the CCB since the start of UES maintenance is provided for participant review in the following link to the [Participant CCB Items spreadsheet](#). This is provided to enable all participant users to identify what specific system improvements have been considered, what the CCB decision and implementation status is, and other pertinent information. The spreadsheet is current through January 2013. Interested participant users can review this information and make additional suggestions to their marketing specialist or through a special general forum thread available through the "Tools" menu of UES. The capability for UES participant users to view the complete history of items considered by the UES CCB was suggested by users who responded to the recent UES Participant Survey and is intended to encourage better communication with participants so FAS can improve the UES system.
