SELECTION OF FORM TYPE FOR APPLICATION FOR INTERNATIONAL REGISTRATION

What type of form do you wish to use?

PRE-POPULATED FORM

(Use for **one** U.S. serial/registration number; *narrowing* of goods/services and/or substitute color drawing are permissible data change within this form.)

Enter the **one** U.S. serial number or registration number as the basis of this International Application.

Enter the number with NO punctuation or other symbols included.

OR

FREE-TEXT FORM

(Use for multiple U.S. serial/registration numbers and/or for cases that do not yet appear in [TARR](#) and/or if changing data **other** than only *narrowing* goods/services and/or substituting color drawing.)

Enter the U.S. serial number(s) or registration number(s) as the basis of this International Application. Separate multiple numbers with a comma.

Enter the number with NO punctuation or other symbols included.

i

The pre-populated form will automatically display the exact information that is already in the USPTO database for one specific U.S. serial number or registration number. If you do not change any data fields, then the pre-populated form will directly submit information that must be certified to WIPO's International Bureau (IB), without independent review of this data at the USPTO. Alternatively, this form may be used where certain data fields can be changed (e.g., either narrowing the scope of the identification of goods and/or recitation of services in the U.S. application or registration, and/or substituting a color drawing of the mark, where the original mark is shown in the USPTO database as a black-and-white image); however, if any data field is changed, an independent review of this data at the USPTO must occur prior to submission as certified to the IB.

The free-text form must be used if 1) the application for International Registration is being based on more than one U.S. serial number or registration number; 2) data is being changed in any way other than only narrowing the scope of the identification of goods and/or recitation of services in the U.S. application or registration and/or substituting a color drawing of the mark, where the original mark is shown in the USPTO database as a black-and-white image; or 3) the U.S. application being used as the basis is not yet loaded into the Office's database at the time of filing, e.g., immediately after an application was filed. Information on this form is not automatically certified, and will not be submitted electronically directly to the IB. Instead, the form will be routed to the USPTO's Madrid Processing Unit for review, for subsequent certification, if appropriate.
