

Attachment 4 - NBCCEDP Evaluation Question Matrix

Evaluation Questions Addressed by the Minimum Data Elements (MDEs)

1. Are high quality B/C screening and diagnostics being provided by NBCCEDP?
2. Do patients diagnosed with cancer initiate cancer treatment in a timely fashion?
3. What is the reach of B/C clinical services via screening provider sites?
 - How many women are served through the NBCCEDP via a paid clinical service?
 - What are the demographics of women served via B/C clinical services?
 - Are grantees reaching screening priority populations?
 - Did grantees meet clinical screening projections?
 - How many women received B/C navigation services only within screening provider sites?
4. To what extent are health systems and their clinics utilizing patient navigators to support priority populations?
 - How many women were served through patient navigation (including those who did and did not receive screening services at B/C provider sites)?
 - How many women receive patient navigation at partner health system clinic sites where EBIs are delivered?
 - What patient navigation activities were delivered to patients?
