TITLE OF INFORMATION COLLECTION: Customer Feedback on CAMP Teen-SPARC Tool Use and Usability

PURPOSE: The teen-SPARC tool was designed by an external recipient (SUNY/Albany, University of Washington, and collaborators) of an NCHHSTP cooperative agreement. The tool is intended to help public health jurisdictions and other entities explore the potential impact of behavior change on reducing sexually transmitted infections among sexually active high-school-attending adolescent population. The tool integrates data from the Youth Risk Behavior Surveillance System (YRBS) and can also be useful to jurisdictions who do not have local YRBS data, and who either have alternative data sources or who wish to explore what-if scenarios.

The tool has been available for about one year and in order to guide improvements to better serve public health practitioners the recipient would like to conduct a survey to gauge usability and inform needed areas for improvement or expansion. The voluntary survey, which would collect no personally identifiable information, is designed to learn more about the community of active and potential users for teen-SPARC but would not be generalizable to people from whom data were not collected. The recipients would like to better understand how people have used the tool so far, how they might envision using it in the future, what barriers they may have faced, and what additional features they would like to see added. We estimate that it should take 7-10 minutes to complete. The recipient will lead all activities related to the design, implementation and analysis of the survey.

DESCRIPTION OF RESPONDENTS: The respondents would be persons who attended a webinar to introduce the release of the tool and/or persons who access teen-SPARC.

 Yes No

If Yes: Please provide a description of both below (or attach the sampling plan)

If No: Please provide a description of how you plan to identify your potential group of respondents and how you will select them or ask them to self-select/volunteer

Potential respondents will be identified from those that attended the kick-off webinar for the teen-SPARC tool and those who access the tool. The voluntary survey will be emailed to attendees and as a pop-up on the tool. On the tool, the survey can be opted-in or opt-ed out, with no requirement to respond in order to access the tool. No sampling plan has been developed as the intent is not to be representative, but gather usability information from voluntary respondents. Further, no statistical methods are applicable as the analysis will be descriptive / qualitative information.

Burden: Provide the Annual burden hours: Multiply the Number of responses and the participation time and divide by 60.

FEDERAL COST: Provide an estimate of the annual cost to the Federal government.

If you are conducting a focus group, survey, or plan to employ statistical methods, please provide answers to the following questions:

The selection of your targeted respondents. Please provide a description of how you plan to identify your potential group of respondents and how you will select them. If the answer is yes, to the first question, you may provide the sampling plan in an attachment.

Administration of the Instrument: Identify how the information will be collected. More than one box may be checked. Indicate whether there will be interviewers (e.g. for surveys) or facilitators (e.g., for focus groups) used.
