TITLE OF INFORMATION COLLECTION: Customer Experience using the PRAMS Integrated Data Collection System

PURPOSE: The Pregnancy Risk Assessment Monitoring System (PRAMS) is a ongoing, state-specific, population-based surveillance system designed to identify groups of women and infants at high risk for health problems, to monitor changes in health status, and to measure progress towards goals in improving the health of mothers and infants. The PRAMS Integrated Data Collection [PIDS] IT system is deployed, managed and maintained for use by all PRAMS Grantees (customers) conducting PRAMS surveillance tasks and activities. The PRAMS IT support contractor made several backend system modifications from March to July 2020. Hence, the objective of this initiative is to assess changes in customer (grantee) experience using the PRAMS IT system and gather their feedback and opinions on system functions that might still have performance issues. The information collected will be used to improve the PRAMS IT system in order to provide better service for the customer (grantees).

DESCRIPTION OF RESPONDENTS: Respondents are authorized PRAMS Grantee users who have an active account in CDC’s SAMS portal and have a role-based account in the PRAMS Integrated Data Collection System.
