TITLE OF INFORMATION COLLECTION:

CDC Laboratory Identification of Emerging Pathogenic Molds Course Learner Feedback Survey

PURPOSE:

The educational content of this 20.5 contact hour, advanced-level, live laboratory/lecture course is relevant to laboratory scientists working in hospitals, reference laboratories, universities and public health settings. The course was offered free of charge at the CDC training laboratory during May 14-16, 2019. The course content covered laboratory identification of medically important molds, including organisms commonly isolated from superficial, subcutaneous, and systemic infections of humans as well as a number of common laboratory contaminants.

An email invitation to complete the Laboratory Identification of Emerging Pathogenic Molds Course Learner Feedback Survey will be sent to learners who completed the live course. The email invitation will include clickable links to either proceed to the survey or unsubscribe (opt out). Learners may also opt out by not responding to the email. If learners click the link to begin the survey in the email, they will be taken to a Survey Monkey webpage housing the survey.

The information to be collected aims to understand to what extent the learners are able to use the content of the courses in their work settings. The survey questions will take approximately 5 minutes to complete. Responses will be anonymous and no unique identifying information will be sought or kept. The feedback we receive will be used by our program in aggregate only. The learner feedback will help the continuous quality assurance of our instructional design process and inform updates to these courses in alignment with learner' needs. Learner feedback will provide valuable insight on the instructional design of this laboratory/lecture course, which includes relevance and applicability of content.

DESCRIPTION OF RESPONDENTS:

This is a voluntary survey to collect information from the learners who completed the Laboratory Identification of Emerging Pathogenic Molds live laboratory/lecture course conducted May 14-16, 2019 at the CDC training laboratory. These learners included laboratory scientists working in clinical, reference, university, and public health laboratories.
