

## Managing type 2 diabetes

(routine maintenance of a well-controlled condition)

### Sample care costs:

Prescriptions	\$2,900
Medical Equipment and Supplies	\$1,300
Office Visits and Procedures	\$700
Education	\$300
Laboratory tests	\$100
Vaccines, other preventive	\$100
<b>Total</b>	<b>\$5,400</b>

### Assumptions

The following are assumptions that all group health plans and health insu

#### Standard Assumptions

*These assumptions are standard across all scenarios.*

Costs do not include premiums.

Condition was not excluded as a pre-existing condition.

There are no other medical expenses for any member covered und

All care is in-network and considered first tier (or the tier associated with the lowest level of cost sharing), for those products that incorporate tiered provider networks.. No out-of-network charges or any other variation in Sample Care Costs.

All services occur in same policy period.

All prior authorizations were obtained.

All services were deemed medically necessary.

All costs (allowed amount, sample care costs, member costs) great

All costs (allowed amount, sample care costs, member costs) less t

All medications are covered as generic equivalents if available.

If the plan has a wellness program that varies the deductibles, co-payments, co-insurance, or coverage for any of the services listed in a treatment scenario, the plan must complete the calculations for that treatment scenario assuming that the patient is participating in the wellness program. networks.

**Instructions to Plans and Issuers:** *Do not modify this tab. The numbers shown here roll up from the **Scenario** tab.*

Insurance issuers must use for this scenario.

per the plan or policy.

Lesser than \$100 are rounded to the nearest hundredth.  
Greater than \$100 are rounded to the nearest tenth.

**Medical Condition:**

**Note:** Services on this tab are listed individually for classification and pricing purposes to facilitate the population of the "Sample care costs" section. Sample care costs are uniform across all group health plans and health insurance issuers. However, some plans or issuers may classify an item or service to complete the "You pay" section, but must leave as is the "Sample care costs" section. Examples of cost sharing and benefit features include, but are not limited to:

- Payment of services based on the location such as inpatient, outpatient, or office; and
- Payment of items as prescription drugs vs. medical equipment.

**Explanation of Scenario:**

**Total** – the sum of allowed amounts for the listed items and services, which is cross-referenced in the "Label and Assumptions" tab, where it is used to calculate the net cost to the member.  
**Date of Service** – includes the day and month of service so plans and issuers understand the order in which items or services are rendered.  
**ICD-9 Diagnosis Code** – includes the ICD-9 code for each item or service.  
**ICD-10 Diagnosis Code** – includes the ICD-10 code for each item or service.  
**CPT, HCPCS or Other Billing Code** – includes medical codes for each item or service. Over-the-counter medications are listed as OTC.  
**Provider Type** – includes one of the types listed on the "Provider Types" tab to classify each item or service by provider.  
**Category** – includes one of the categories listed on the "Categories" tab to classify each item or service so it rolls up into the same category in the "Summary" tab.  
**Description** – includes the short form descriptor for a CPT code, or an appropriate descriptor for a non-CPT billing code.  
**Allowed Amount** – includes an estimated national average allowed amount for each item or service, which plans or issuers must use to calculate the net cost to the member.  
**Notes** – includes any special notes for an item or service.

The following are the provider  
group health plans and health

**Provider Type**

Diabetes Educator

Dietitian

Emergency Room

Ophthalmology

Pharmacy Retail

Podiatry

Primary

OMB Control Numbers 1545-2229, 1210

Provider types to use on the "Scenario" tab ~ "Provider Type" column to classify each service by provider type. This aids insurance issuers in applying benefits to each item and service.

**What providers are covered under this Provider Type and other notes:**

Primary Care Physician or non-Specialist

0938-1146, and 0147

The following are the categories to  
Coverage Example label on the "L:

**Category**

Prescriptions

Medical Equipment and Supplies

Office Visits and Procedures

Education

Laboratory tests

Vaccines, other preventive

OMB Control Numbers 1545-2229, 1210-0147, :

use on the "Scenario" tab ~ "Category" column to classify each item and service so it rolls up to the same category label and Assumptions" tab. This facilitates consistency between the "Scenario" tab and Coverage Example label.

**What services are covered under this Category and other notes:**

Includes all prescription drugs (generic, brand/preferred, non-preferred) which are not administered in a hospital, office or other facility. Note, this category may also include over-the-counter drugs such as aspirin and other pharmaceuticals.

Includes durable medical equipment, orthotics, prosthetics

Includes services by physicians and other providers.

Includes blood work
