

UNITED STATES FOOD AND DRUG ADMINISTRATION

Notification Procedures for Statements on Dietary Supplements

OMB Control Number 0910-0331

**JUSTIFICATION MEMORANDUM FOR NON-SUBSTANTIVE CHANGE
REQUEST**

The Food and Drug Administration (FDA, us or we) is requesting a non-substantive change request (83-C) for the information collection under OMB control no. 0910-0331, “*Notification Procedures for Statements on Dietary Supplements.*” The information collection supports food labeling provisions of the Federal Food, Drug, and Cosmetic Act (21 CFR 101.93). We are requesting approval to upgrade the current electronic system, the FDA Unified Registration Listing System (FURLS) (Form FDA 3880), to the Food Applications Regulatory Management (FARM) system. This results in certain formatting changes for our respondents, but it results in an operational efficiency for us. Because the same information will be collected, we expect no change in burden. The FARM system intends to minimize changes for consumers while maximizing operational efficiency for FDA. The FARM system was developed to closely follow FURLS in appearance and should require no additional burden on the consumer. However, FURLS does not interface with other systems we utilize that house relevant data and information. Here, the benefit to FDA is that the FARM system provides a single resource that allows access to data from multiple modules, improving our efficiency with items such as correspondence tracking.

Currently, we are underway in our renewal of the information collection, having published a 60 day notice soliciting public comment on February 7, 2019 (84 FR 2528), however, we are ready to deploy the FARM system and wish to begin the transition immediately. To that end, we have provided screen shots for review and approval, and have also invited public comment in our 30 day notice, which is currently pending publication.
