General Notes:

The question numbers are the variable names. Question numbers in parentheses are for administrative purposes and will not appear on the final data set. CATI-System and other contractor-created variables are included in the survey instrument, are surrounded by brackets, and may be included on the final data set.

The following abbreviations are used within the instrument: legitimate skip is LEGIT SKIP, DK is Don't Know, REF is Refused, MTP is Made to Penetrate, and PTSD is Posttraumatic Stress Disorder. Responses of Don't Know, Refused and LEGIT SKIP will be represented using codes -1, -2 and -3, respectively. Blank fields will be interpreted as inadvertent skips.

This survey will be administered both in English and in Spanish (following translation).

Interviewers will not read answer options listed in ALL CAPS. Answer options listed in both upper and lower case are read to the respondent.

The minimum number of relationships identified per respondent should equal the maximum number of perpetrators reported for that respondent across all violence victimization behaviors of a specific type endorsed?. If 996 is entered before the minimum number of relationships have been provided, a soft error check should appear. For example, if SC05=2 and SC06 = 4, then we should expect, at a minimum, 4 relationships to be provided. If 996 is entered for SC07_02 or SC07_03 or SC07_04, the soft check will appear.

The age at first occurrence of a victimization should be younger than the current age specified in RC1_CHK or calculated from RCMO and RCYR. If the age a victimization first occurred is older than current age, CATI will display a soft check: *"It looks as though I may have entered your current age wrong. We just entered {fill: response from current question} but earlier I put your current age as {fill: RespAge}. Would you like me to go back and change your current age or the age I just entered?"* Depending on the information provided, the interviewer will then either revise the current age, revise the age-at-first for the victimization behaviors in question, or suppress the check and keep the inconsistent responses. These occurrences should be tracked in real time. Age-at-first is a critical variable and if these inconsistencies are present at a high rate, we will want to reconsider the idea of a "soft check". One note of caution: If the respondent age is changed, it is possible that this will cause inconsistencies with age-at-first collected in sections earlier in the survey, resulting in data quality (QA) errors in the data delivery - these QA failures will need to be documented and explained.

(V_INTRO)

When we began this survey, I told you we'd be discussing health and injuries. The next set of questions asks about experiences that can directly impact your health or may have resulted in injury. These experiences may or may not have happened to you. There will be some questions about physical injuries, harassing behaviors, and unwanted sexual activity.

Remember, you don't have to answer any question that you don't want to.

Please DO NOT include bill collectors, telephone solicitors, other sales people, or others following or contacting you as part of their job.

These questions are detailed and the language is explicit, which some people may find upsetting. It is important that I ask the questions this way so that you understand what I mean. Your answers will help us to learn how often these things happen. You can skip questions you don't want to answer and you can stop at any time.

First, I'm going to ask you about unwanted sexual situations, including verbal harassment and unwanted touching.

ALCOHOL/DRUG-FACILITATED RAPE AND MADE TO PENETRATE

AD_INTRO1

In this section I will ask you about situations in your life in which you ever experienced unwanted sex or sexual contact. By this I mean sexual contact that you did not consent to and that you did not want to happen.

Sometimes unwanted sex or sexual contact happens when a person is unable to consent to it or stop it from happening because they are too drunk, high, drugged, or passed out from alcohol, drugs, or medications. This can include times when they voluntarily consumed alcohol or drugs or times when they were given alcohol or drugs without their knowledge or consent. Please remember that even if someone uses alcohol or drugs, what happens to them is not their fault.

INTERVIEWER NOTE: PRESS "1" TO CONTINUE.

ATTEMPTED PHYSICALLY FORCED SEX
