

Partnership Agreement

he EPA Green Power Partnership encourages the voluntary use of green power to reduce the risk of climate change. Partners benefit from the use of green power, while supporting the development of new, renewable energy in the United States.

By joining EPA's Green Power Partnership, Partners commit to:

- Use green power that meets or exceeds Partnership requirements.
- · Report on green power use annually.
- Use the Green Power Partner mark in a manner that is consistent with Partner mark use guidelines, available at www.epa.gov/greenpower/documents/gpp_guidedoc_mark.pdf.

In return, EPA commits to:

- · Provide public recognition.
- Provide procurement and communications assistance, as requested by Partner.
- Provide a brief description of the Partner's green power commitment on the Green Power Partnership Web site.

General Terms:

- Either party can terminate this agreement at any time without prior notification or penalties and with no further obligation. EPA will not comment publicly regarding the withdrawal of Partners.
- Partner agrees that the activities it undertakes connected with this voluntary agreement are not intended to provide services to the federal government and that the Partner will not seek compensation from a federal agency.
- Partner agrees that it will not claim or imply that its participation in the Green Power Partnership constitutes EPA approval or endorsement of anything other than its participation in the program and will not make statements or imply that EPA endorses the purchase or sale of the Partner's products and services or the views of the Partner organization.
- EPA may post information about the Partner's green power use publicly.
- EPA may periodically revise program benchmark levels or other eligibility requirements.

Key Green Power Partnership Requirements

Your Organization's Baseload If your annual electricity use is	Green Power Partner Requirements You must, at a minimum, use this much green power	Green Power Leadership Club Requirements You must, at a minimum, use this much green power for your entire organization
≥ 100,000,001 kWh	3% of your use	30% of your use
10,000,001 - 100,000,000 kWh	5% of your use	50% of your use
1,000,001 - 10,000,000 kWh	10% of your use	100% of your use
≤ 1,000,000 kWh	20% of your use	Not Applicable

- Eligible green power includes electricity generated from solar, wind, geothermal, biogas, and certain forms of biomass and hydropower.
- Green power must be sourced from eligible U.S.-based generation facilities.
- Requirement can be met with any combination of green power products (i.e., utility product, RECs, or on-site generation).
- Partner purchases must be voluntary and incremental to the renewable electricity included in the standard electricity service.
- Requirements must be entirely met with power from "new" renewable facilities (i.e., installed within the last 15 years).
- Partners may join organization-wide (U.S. operations only), at the facility-level, or a logical aggregation of facilities less than organization-wide.

More details are available in the Partnership Requirements Document, http://www.epa.gov/greenpower/documents/gpp_partnership_reqs.pdf
