Title: Airborne Hazards and Open Burn Pit Registry (AHOBPR) Web-accessible Self-Assessment/Questionnaire, VA Form 10-10066.

OMB Control Number: 2900-0800.

Type of Review: Reinstatement with change of a previously approved collection.

Abstract: Public Law 112–260 Section 201, enacted by President Obama on 10 January 2013, required Department of Veterans Affairs (VA) to establish and maintain an “Airborne Hazards and Open Burn Pit Registry (AHOBPR)” no later than one year from enactment. VA launched the AHOBPR in June 2014. There is no sunset date identified in the law. The Secretary of Veterans Affairs may “include any information in such registry that the Secretary of Veterans Affairs determines necessary to ascertain and monitor the health effects of the exposure of members of the Armed Forces to toxic airborne chemicals and fumes caused by open burn pits.” Currently, VA plans to operate the AHOBPR indefinitely, and we request approval to continue administering the questionnaire.

The Qarmat Ali (QA) program is a new request for a follow-up information collection for a subset of Veterans impacted by a specific airborne hazard. In the Spring and Summer of 2003, approximately 700 U.S. Servicemembers may have been impacted by a specific airborne hazard while serving at a water injection plant in Qarmat Ali, Iraq. The Department of Defense (DoD) was unable to determine specific exposure levels near the water treatment facility. In 2010, in response to DoD’s notification, the VA offered no-cost medical evaluations and encouraged the cohort to enroll in a new Qarmat Ali medical surveillance program within the Gulf War Registry. The QA cohort is also eligible to participate in the AHOBPR program due to their deployment to Iraq. As part of the planned 5-year periodic medical follow-up and surveillance program, self-reported information will be collected through the AHOBPR as outlined above. Information collected is voluntary and is used to provide outreach and quality health services to AHOBPR participants. Collected data contributes to VA’s ability to understand the potential health effects of the exposure to burn pit emissions and other airborne hazards during deployment, such as particulate matter.
