PROGRAM AND BUDGET SUMMARY STATEMENT (Food Stamp Program) PART A – BUDGET PROJECTION

GENERAL. Part A of the Program and Budget Summary Statement is used to report projections of Federal funding needs for the upcoming Federal Fiscal Year. The quarterly budget projections should be developed in the same functional categories as those found on the SF-269 (Financial Status Report). The budget projections represent the best estimate of anticipated expenditures to be funded at the appropriate rate of Federal financial participation for that category. This report should be updated as needed. Each update will serve to project anticipated expenditures for the current year. Data for a category which was previously submitted but has not changed should be carried forward onto the updated report.

DUE DATE: Part A is to be submitted annually, no later than August 15 of each year. One copy each should be retained by the respondent State Program and Finance Directors and the remaining copies sent to the appropriate FNS Regional Office for approval.

A separate form FNS-366A is required for States to report any FNS-approved demonstration costs required to be reported separately. Specify the project in the Remarks block. Do not include such separate data in the Statewide FNS-366A for the regular (coupon/electronic benefit transfer (EBT)) program unless specifically instructed to do so by FNS.

PROJECTING FUNDING NEEDS: Those responsible for the form's completion will evaluate any factors of program activity that impact on program costs, determine the projected dollar impact of those factors and adjust the program budget accordingly.

Such analysis normally will take into account, but not be limited to, the following factors:

- The number and salary level of employees. Other factors affecting personnel costs including
- (1) Anticipated Increases in pay rates or benefits, and
 - (2) Reallocations of staff among units or functions, insofar as these might result in cost increases or decreases.

Costs for purchasing, leasing, and maintaining equipment and space, especially concerning

- (1) Any upcoming one-time-only purchases of new capital assets such as ADP equipment,
- (2) Renegotiation of leases,
- (3) Changes in depreciation rates or procedures.

Cost implications of corrective action plans Anticipated changes in program regulations and operating guides and instructions, Training needs, Travel costs, and Adjustments in insurance premiums.

A narrative justification should be attached to each Budget Projection Statement, documenting the assumptions used to arrive at the figures reported. The narrative should cover as many of the items listed above, and any other deemed relevant as having a significant impact on costs. The State agency is not required to address every contributing factor in every submission of a Budget Projection Statement. Rather, the narrative should concentrate on items that account for increases or decreases in costs from the preceding submissions and having greatest impact. Lengthy explanations are not necessary, but pertinent figures used in the analysis (for example, the inflation rate or salary rates and benefits) should be included.
