

Request for Approval under the “Generic Clearance for the Collection of Routine Customer Feedback” (OMB Control Number: XXXX-YYYY)

TITLE OF INFORMATION COLLECTION: Medicare Administrative Contractor (MAC) Provider Customer Experience

PURPOSE:

Executive Order 12862 requires Federal Agencies to continuously reform practices and operations to improve the customer experience. It specifically instructs Agencies to survey customers to determine the kind and quality of services they want and their level of satisfaction with existing services. To meet this objective, the Centers for Medicare & Medicaid Services (CMS) developed a survey to measure customer satisfaction for Medicare Administrative Contractor (MAC) services. MACs are private health care insurers that have been awarded a geographic jurisdiction to process Medicare Part A and Part B (A/B) medical claims or Durable Medical Equipment (DME) claims for Medicare Fee-For-Service (FFS) health care providers on behalf of beneficiaries. CMS relies on the network of MACs to serve as the primary operational contact between the Medicare FFS program and the health care providers enrolled in the program that submit claims on behalf of beneficiaries. MACs perform functions such as claims processing, provider education, responding to telephone and written inquiries, and handling appeals.

The purpose of this fast track request is to collect MAC customer service feedback through health care provider interactions such as website and internet portal visits for the sixteen MAC Jurisdictions (5, 6, 8, 15, A, B, C, D, E, F, H, J, K, L, M, and N). The end goal of this effort is to collect more actionable data to help improve the overall customer experience and improve the response rate from prior feedback mechanisms.

CMS will gain feedback through the various touch points the provider uses to interact with the MAC to measure the provider experience in both Spanish and English. Both versions of the survey are attached to this request. This is part of a series of requests to help CMS reach its goal of improving the provider experience. Other requests may include obtaining feedback for provider enrollment, provider outreach and education, claims processing, appeals, and medical review.
