

JUSTIFICATION FOR NON-SUBSTANTIVE CHANGE REQUEST

REQUEST FOR ADVISORY OPINION

1405-0174 | DS-7786

This non-substantive change request seeks to provide OMB with screenshots of PM/DDTC's newly developed Advisory Opinion electronic application.

On July 13, 2017 OMB approved a substantive change request for IC 1405-0174 (DS-7786) to allow for electronic submission of an Advisory Opinion with defined data fields which are most relevant and necessary for requests for Advisory Opinions. Since then, the platform in which the form DS-7786 is available and submitted has been updated to ServiceNow.

DDTC is not making changes to the information being collected or the means through which it is submitted. Although the platform of DDTC's electronic system is changing, industry will continue to access and submit the DS-7786 electronically through DDTC's website.
