SUPPLEMENTARY INFORMATION: We have received an application from the Coachella Valley Association of Governments for a 30-year incidental take permit under the ESA. The application addresses the potential for “take” of the federally endangered Casey’s June beetle (*Dinacoma caseyi*) likely to occur incidental to the construction, maintenance, and use of a portion of the proposed CV Link multi-modal pathway in the City of Palm Springs, Riverside County, California. We invite comments from the public on the application package, which includes a low-effect habitat conservation plan (HCP). We have preliminarily determined that this proposed action is eligible for a categorical exclusion under the National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*). The basis for this determination is discussed in our draft environmental action statement and associated low-effect screening form, which are also available for public review.

Background

The U.S. Fish and Wildlife Service (Service) added the Casey’s June beetle to the List of Endangered and Threatened Wildlife as endangered on September 22, 2011 (76 FR 58954). Section 9 of the ESA (16 U.S.C. 1531 *et seq.*) and its implementing regulations in title 50 of the Code of Federal Regulations (CFR) prohibit the take of fish or wildlife species listed as endangered or threatened. “Take” is defined under the ESA to include the following activities: “to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct” (16 U.S.C. 1532); however, under section 10(a)(1)(B) of the ESA, we may issue permits to authorize incidental take of listed species. “Incidental taking” is defined under the ESA implementing regulations as taking that is incidental to, and not the purpose of, carrying out an otherwise lawful activity (50 CFR 17.3).
