

Mockups of Relevant Portions of the 2020 eCDRweb Reporting Tool

Illustrating Changes from the CDR Revisions Proposed Rule

EPA-HQ-OPPT-2018-0321

March 20, 2019

Table of Mock-Ups

- Part I. Company and Site Identification
- Part II. Manufacturing Information
- Part III. Processing and Use Information
- Reporting a Co-Manufactured Chemical
- Multi-Reporter Submission: Chemical Identity is Unknown

Part I: Company and Site Identification

Mock-ups of reporting tool views associated with the following changes:

- Providing both the U.S. and foreign parent companies, as appropriate
- Adding NAICS to the site identification page
- Providing voluntary public contact information

U.S. Parent Company Information – Full View

Reporting a Co-Manufactured Chemical

Mock-ups of reporting tool views associated with the following changes:

- Identification of the producing company by the contracting company
- Sending the notification of the need to report to the producing company by the contracting company

Q: What is a co-manufactured chemical?

A: A co-manufactured chemical is produced exclusively for another person who contracts for such production. To be considered co-manufactured, the producing company produces the chemical exclusively for another person (the contracting company) under contract for that production, and the contracting company specifies the identity of the chemical, the total amount produced, and the basic technology for the plant process.

- *The contracting company is the primary submitter who initiates the multi-reporter submission who provides volume and processing and use information.*
- *The producing company is the secondary submitter who provides the manufacturing-related information.*

Primary Submitter: Identifying the Producing Company (Full View)

Note: This is the view for the primary submitter (i.e., the contracting company).

The contracting company identifies the producing company, providing the information needed to send a notification of the need for the producing company to provide information for the co-manufactured chemical.

The next two slides provide close-ups of this view.

The screenshot shows a web browser window displaying the EPA's 2020 Form U interface. The page title is "2020 Form U > Site A". The user is logged in as "Jane Doe, Primary Authorized Official (TEST ORGANIZATION LLC)". The page has several tabs: "Company & Site Identification Information", "Chemicals", "Joint Report", and "Additional Information". The "Producing Company Information" section is active. It contains a checkbox for "I claim this producing company information as CBI". Below this are input fields for "First Name", "Last Name", "Position (optional)", "Producing Company Name", "Phone Number", "Phone Extension (optional)", "Email Address (optional)", "Mailing Address 1", "Mailing Address 2 (optional)", "City", "State", "Postal Code", and "Country". There are "Save" and "Cancel" buttons at the bottom of this section. Below the form is a text box for "Please include information you wish the producing company to see. Clicking the link below will relay the information in this text box to your co-manufacturing company via [unencrypted e-mail](#)." Below this text box is a link "Notify the producing company of the exposure information" and another set of "Save" and "Cancel" buttons. At the very bottom of the page are "Previous" and "Continue" buttons.

Primary Submitter: Send Producing Company Notification (Scroll 1)

Note: This is the view for the primary submitter (i.e., the contracting company).

The “From” field is automatically filled in using the information about the contracting company site. The “To” field must be entered by the contracting company in order to notify the producing company site.

The screenshot shows a web browser window with the URL 'http://'. The page title is 'A Web Page'. The navigation bar includes 'Home' and 'User Management', and the user is identified as 'Jane Doe, Primary Authorized Official (TEST ORGANIZATION LLC)'. The main content area is titled '2020 Form U > Site A' and contains several tabs: 'Company & Site Identification Information', 'Chemicals', 'Joint Report', and 'Additional Information'. Below these tabs are two buttons: 'Upload XML' and 'Producing Company Notification'. The 'Producing Company Notification' button is selected. The page displays the 'Producing Company Information' section, which includes a form titled 'Send Producing Company Notification'. The form fields are: 'From:' (pre-filled with 'primary.submitter@contractingcompany.com'), 'CC:' (pre-filled with 'eTSCA_RMAM@epa.gov'), 'To:' (with instructions to enter email addresses separated by semicolons or commas), 'Subject:' (pre-filled with '2020 CDR Site Name - Chemical Exposure Information'), and 'Message:' (pre-filled with 'I am providing chemical exposure information for the specified chemical. Etc.').

Primary Submitter: Send Producing Company Notification (Scroll 2)

Note: This is the view for the primary submitter (i.e., the contracting company).

If information was provided when the producing company identity was provided, these boxes will be prefilled. The message can be adjusted at this time.

Additional Comments:

Please include information you wish the producing company to see. Clicking the link below will relay the information in this text box to your producing company via [unencrypted e-mail](#).

[Notify the producing company of the need to provide the manufacturing information to EPA](#)

Primary Submitter: Manufacturing-Related Information Provided by Contracting Company

- Chemical identity
 - TSCA identity
 - Alternate name used for producing company, if needed
- Production volumes
 - The 2019 volume reported would be used for determining the percentages for the processing and use information
 - Past production volumes (e.g., 2016, 2017, 2018 for 2020 submission period)
 - In the event that there are multiple producing companies, these volumes would be the total for the chemical

Secondary Submitter: Producing Company Information View
