PRIVACY THRESHOLD ANALYSIS (PTA)

The PTA is a compliance form developed by the Privacy Branch to identify the use of Personally Identifiable Information (PII) across the Department. The PTA is the first step in the PII verification process, which focuses on these areas of inquiry:

- Purpose for the information,
- Type of information,
- Sensitivity of the information,
- Use of the information,
- And the risk to the information.

Please use the attached form to determine whether a Privacy and Civil Liberties Impact Assessment (PCLIA) is required under the E-Government Act of 2002 or a System of Record Notice (SORN) is required under the Privacy Act of 1974, as amended.

Please complete this form and send it to your program Privacy Liaison Officer (PLO). If you have no program Privacy Liaison Officer, please send the PTA to the HUD Privacy Branch:

John Bravacos, Senior Agency Official for Privacy
Privacy Branch
U.S. Department of Housing and Urban Development

privacy@hud.gov

Upon receipt from your program PLO, the HUD Privacy Branch will review this form. If a PCLIA or SORN is required, the HUD Privacy Branch will send you a copy of the PCLIA and SORN templates to complete and return.

SPECIFIC PTA QUESTIONS

1. Reason for submitting the PTA: New PTA

The PTA is a required form for paperwork reduction act renewal package for OMB Collection 2502-0261, "The Housing Counseling Program". The PTA form is a new requirement since the last time the Office of Housing Counseling renewed this OMB collection. The PTA form replaces the old PIA (Privacy Impact Assessment) form.

The HUD-9902 form is embedded in the Housing Counseling System (HCS/ H11 system). Once a quarter each of our HUD- approved counseling agencies are required to electronically transmit their quarterly client data report (HUD-9902) from their client management system (CMS) to HUD's housing counseling system (HCS) system. There are no changes to the HUD-9902 form for this PRA renewal collection.

2. Does this system employ the following technologies?

If you are using these technologies and want coverage under the respective PIA for that technology, please stop here and contact the HUD Privacy Branch for further guidance.

- Social Media
- Web portal¹ (e.g., SharePoint)
- Contact Lists
- Public website (e.g. A website operated by HUD, contractor, or other organization on behalf of the HUD)
- None of these

3. From whom does the Project or Program collect, maintain, use, or disseminate information?

Please check all that apply.

- This program collects no personally identifiable information²
- Members of the public
- HUD employees/contractors (list programs): our current contractor is Salient. Data collected from the 9902 report in HCS is often extracted and used on reports to the Commissioner or Congress. The

¹ Informational and collaboration-based portals in operation at HUD and its programs that collect, use, maintain, and share limited personally identifiable information (PII) about individuals who are "members" of the portal or "potential members" who seek to gain access to the portal.

² HUD defines personal information as "Personally Identifiable Information" or PII, which is any information that permits the identity of an individual to be directly or indirectly inferred, including any information that is linked or linkable to that individual, regardless of whether the individual is a U.S. citizen, lawful permanent resident, visitor to the U.S., or employee or contractor to the Department. "Sensitive PII" is PII, which if lost, compromised, or disclosed without authorization, could result in substantial harm, embarrassment, inconvenience, or unfairness to an individual. For the purposes of this PTA, SPII and PII are treated the same.

	<p>only PII is the name of the agency submitting the report. All the other PII stored in HCS is limited to HUD staff use only.</p> <p><input type="checkbox"/> Contractors working on behalf of HUD</p> <p><input type="checkbox"/> Employees of other federal agencies</p> <p><input type="checkbox"/> Other (e.g. business entity)</p>

³ Header: Information that is placed before the actual data. The header normally contains a small number of bytes of control information, which is used to communicate important facts about the data that the message contains and how it is to be interpreted and used. It serves as the communication and control link between protocol elements on different devices.

Payload data: The actual data to be transmitted, often called the payload of the message (metaphorically borrowing a term from the space industry!) Most messages contain some data of one form or another, but some actually contain none: they are used only for control and communication purposes. For example, these may be used to set up or terminate a logical connection before data is sent.

<p>to annual privacy training required of all HUD personnel?</p>	<p><input checked="" type="checkbox"/> Yes. If yes, please list: new Office of Housing employees take a week long mentoring program. . One of the topics covers involves how to use the HSC system. The Office of Housing Counseling Staff use this system on a daily basis as part of their management of their housing counseling agency portfolio. Also, some of the screens in HCS are used in the staff to administer and manage the annual Comprehensive Housing Counseling Grant Awards.</p>
