GK-12: Number of Respondents, Frequency of Response, and Annual Hour Burden

The estimated average number of annual respondents is 1,267, with an estimated average annual response burden of 3,529 hours. The Web-based collection is an annual activity of the GK-12 program. We estimate an annual average of 86 awards, 588 NSF-funded fellows, and 593 lead/NSF-supported cooperating teachers responding each year. The number of respondents was estimated using data from the current portfolio of GK-12 awards, and the estimated annual hour burden per respondent was determined using the burden information reported by respondents during the last collection cycle, when only NSF-funded fellows and lead/NSF-supported cooperating teachers reported data.

The burden estimated is outlined below.

Respondent Type	Estimated Average Annual No. of Respondents	Estimated Average Annual Burden Hours Per Respondent	Estimated Annual Burden Hour Total
Awardees	86	17	1,462
NSF-funded graduate fellows	588	1.7	1,000
Lead/NSF-supported cooperating teachers	593	1.8	1,067
Total	1,267		3,529

GK-12: Hour Burden Estimates by Each Form and Aggregate Hour Burdens

As mentioned above respondents will be awardees (as reported by the project's lead PI with help from the project coordinator), NSF-funded graduate fellows, and lead/NSF-supported cooperating teachers. The estimated total annual response burden is 3,529 hours. There is a different Web-based form for each respondent type. The annual burden by form was calculated as follows:

Form Type	Respondent Type	No. of Respondents	Burden Hours Per Respondent	Total Burden Hours
Award form	Awardees	86	17	1,462
Fellow form	NSF-funded graduate fellows	588	1.7	1,000
Teacher form	Lead/NSF-supported cooperating teachers	593	1.8	1,067
Total		1,267		3,529

GK-12: Estimates of Annualized Cost to Respondents for the Hour Burdens

The overall annualized cost to the respondents is estimated to be \$108,515. The following table shows the annualized estimates of costs to respondents. The estimated hourly rate for PIs, who are generally university professors, is based on a report from the American Association of University Professors, “Annual Report on the Economic Status of the Profession, 2014-15,” *Academe*, March–April 2015, Survey Report Table 4. According to this [report](#), the average salary across all academic ranks and across all types of doctoral-granting institutions (public, private-independent, religiously affiliated) was \$87,838. The hourly rate for fellows is based on their annual stipend of \$30,000. The rate for cooperating teachers was established by using the Bureau of Labor Statistics’ May 2015 National Occupational Employment and Wage Estimates, which estimates the mean annual wage for those in [Education, Training, and Library Occupations](#) to be \$52,210. Each of these figures was then divided by the number of standard annual work hours (2,080) to determine an average hourly rate for each respondent type. Those rates and the corresponding total annual costs are indicated in the table below:

Respondent Type	No. of Respondents	Burden Hours Per Respondent	Average Hourly Rate	Estimated Annual Cost
Awardees	86	17	\$42	\$61,404
NSF-funded graduate fellows	588	1.7	\$14	\$13,994
Lead/NSF-supported cooperating teachers	593	1.8	\$25	\$26,685
Total	1,267			\$102,083

GK-12: Estimates of Costs to the Federal Government

Computing the annualized cost to NSF for the GK-12 data collection was done by taking the budget for the most recent year and calculating the costs for each of the following operational activities involved in producing, maintaining, and conducting the data collection:

Operational Activities	Cost Over Three Years
System Development (includes initial development of the database and Web-based application, and later changes requested by the program, e.g., increased reporting tools, additional validations)	\$172,232
System Maintenance, Updates, and Technical Support (system requires updates each year before opening the collection; maintenance is required to keep the system current with technology, e.g., database servers, operating systems)	\$75,700
Data Collection Opening and Support (e.g., online and telephone support to respondents and contacting respondents to encourage completion of the questions), Reporting (as defined by DGE), and Followup Activities (e.g., providing data to other consultants)	\$129,111
Three-Year Total for All Operational Activities	\$377,044

The annualized cost was computed as one-third of the total three-year costs; thus, the annualized cost to NSF for the GK-12 collection is \$125,681.
