Privacy Act and Public Burden Information

Privacy Act Information

The Privacy Act applies to this information collection. Information collected will be kept private as noted in the System of Records Notice is 09-20-0112, *Fellowship Program and Guest Researcher Records*.

Public Burden Information

Form Approved
OMB No. 0920-0765
Exp. Date 01/31/2021

Public reporting burden of this collection of information takes an estimated average of 90 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer; 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-0765).

1 INTRODUCTION

The purpose of this document is to list all the data elements of the host site application collected online through the Fellowship Management System (FMS). The FMS online host site assignment module is a streamlined mechanism for agencies, who are interested in hosting fellows of the Centers for Disease Control and Prevention (CDC) fellowships to submit their assignment proposals online and track statuses of the application processes. The FMS is a robust flexible framework and is successfully tailored for various CDC fellowships. The following fellowships use the FMS Host Site Application module to collect applications from federal and non-federal public health agencies and organizations:

- Epidemic Intelligence Service (EIS)
- Public Health Associate Program (PHAP)
- Preventive Medicine Residency and Fellowship (PMR/F)

The following fellowships currently use the FMS Host Site Application module only to collect host site applications from federal agencies (e.g., placements within the CDC). They currently do not collect applications from nonfederal agencies.

- Public Health Informatics Fellowship (PHIF)
- CDC-Hubert Global Health Fellowship (Hubert)

The CDC Epidemiology Elective Program for senior medical and veterinary students (Epi-Elect) and Prevention Effectiveness Fellowship (PEF) currently do not use the FMS Host Site Application module to collect applications from federal host sites (i.e., CDC).

1.1 Document Structure

This document is broken down by the major pages of the FMS Host Site Application. In this document, each page of the FMS Host Site Application has sections and some sub-sections. In addition, application instructions, login, and registration pages are included. [Appendix A](#) provides examples of emails generated by the FMS for the PHAP host site application and [Appendix B](#) is an example of agreement with CDC to detail staff to host sites. The instructions and emails provided in this document are examples from PHAP; instructions and emails in the FMS Host Site Application are tailored to each CDC fellowship's requirements, eligibility criteria, information, and timeline.

The main screenshots of the Host Site Application pages, sections, or subsections are from PHAP with additional screenshots of additional data elements collected by other CDC fellowships.

Following the screenshots in each section is a table that shows the status of the collection of data elements by each CDC fellowships. The following labels indicate the status of the collection:

- "Yes" indicates that the fellowship collects the information and that applicants are required to submit this information.
- "Opt" indicates that the fellowship collects the information and that it is optional for applicants to submit this information.
- "-" indicates that the fellowship does not collect this information.

In addition, the table shows the data values of each data element, and for ones that have a list of dropdown values, the data value category is hyperlinked to its list located in [Appendix C](#).

The following table (Table 1.1 -a) provides an overview of the major pages and sections in the FMS Host Site Application module used by each fellowship program. The “Yes” indicates that the fellowship uses the page or section, whereas, the “-” indicates that the fellowship does not use the page or section.

CDC's Office for State, Tribal, Local and Territorial Support (OSTLTS) seeks proposals for field-based assignments for the Public Health Associate Program (PHAP) on an annual basis. PHAP is a two-year workforce development program that provides opportunities for future public health professionals to gain broad experience in the day-to-day operation of public health programs.

Please read the [Application Instructions](#) carefully before applying.

4 APPLICATION INSTRUCTIONS PAGE

4.1 Application Instructions

Figure 4.1-aa. Application Eligibility and Finalization Example from PHAP*

Application Instructions

Eligibility

Host sites for the Public Health Associate (PHAP)¹ must be public health agencies or organizations engaged in delivering public health services at the community level, including state, territorial, city, county, and tribal entities as well as CDC quarantine stations. Applications will be accepted only from eligible host sites that submit this application to PHAP.

Host Sites will be assigned an associate to work within their organizational environment under the terms of PHAP's [Agreement to Detail Civil Service Employee](#) (PDF-326KB). Please note that approved host sites must have a signed copy of the document on file at CDC prior to the assigned associates start date. All approved Host sites will be notified to send the signed agreement to the PHAP mailbox at PHAP@cdc.gov. Please contact the PHAP mailbox with any questions about this process

The following requirements apply to all host site opportunities.

The assignment can be a two year one-program assignment or two different assignments. The assignment must be suitable for graduates with a bachelor's degree and little to no public health experience. A two-year one-program assignment should demonstrate elevated levels of learning/experience. The assignment must involve implementing public health interventions at the community level in the following program areas

- [Center for Global Health \(CGH\)](#)
- [National Institute for Occupational Safety and Health \(NIOSH\)](#)
- [Office for State, Tribal, Local and Territorial Support \(OSTLTS\)](#)
- [Office of Infectious Diseases \(OID\)](#)
- [Office of Noncommunicable Diseases, Injury and Environmental Health \(ONDIEH\)](#)
- [Office of Public Health Preparedness and Response \(OPHPR\)](#)
- [Office of Public Health Scientific Services \(OPHSS\)](#)
- [Office of the Associate Director for Policy \(OADP\)](#)
- [Program Performance and Evaluation Office \(PPEO\)](#)
- [Office of the Associate Director for Science \(OADS\)](#)

Other program areas may be suggested to fit the health department's needs.

The proposed associate activities should address the host sites' needs and ensure the development of specified competencies. The competencies reflect the program's mission to prepare highly qualified, entry-level professionals who are capable of meeting public health workforce needs through frontline experience in state, tribal, local, and territorial public health agencies. Therefore, a detailed plan to develop associate competencies should be documented and noted in the application. An exemplary application links the competencies to specific work products and activities as well as host-site supported training.

Host sites must assure the availability of a host site supervisor to provide day-to-day direction for the associate, interact with CDC program managers, participate in the CDC Orientation Seminar, conduct associate performance reviews and develop a detailed Associate Development Plan. The host site supervisor should have direct responsibility over the functions to be performed by the associate to ensure that the associate is provided the level of guidance, direction, performance assessment, and training needed to perform the required job functions.

Host sites may apply for more than one associate; a separate application must be completed for each requested associate.

Host sites may apply for more than one associate; a separate application must be completed for each requested associate.

Application Finalization

After completing all sections of the application, please hit the "submit" button. Failure to hit the submit button will result in an incomplete application. An application must be withdrawn in order to update the information. You must resubmit the application after the updates are completed.

The application can be printed both while in progress and after submission.

A host site can track an application's status (pending, submitted, or withdrawn) and the current status of the review in the Track Your Application section.

*Note: Instructions and information are tailored to each fellowship program's information.

Figure 4.1-ab. Application Submission and Evaluation Criteria Example from PHAP*

Application Submission

Applications must be submitted through the website application.

If there is a problem with the website, please contact phap@cdc.gov with your return contact information and a PHAP team staff member will contact you to discuss a resolution or other arrangements.

Application Deadline

Applications must be submitted no later than 11:59 pm (ET) on Month Day, Year.

Evaluation Criteria

Applications must demonstrate the ability to provide a comprehensive two-year work experience that

Is suitable for candidates with a recent bachelor's degree but without significant work experience

Has well-defined activities in the designated activity areas and references the competencies and training required or met by those activities

Occurs as a sequence of two assignments that support the PHAP mission and vision

Proposals that address these critical factors will be evaluated and application forms will be scored based on the following criteria:

Scope of Assignment

Demonstrates capacity to provide a comprehensive, high quality two-year hands-on learning experience in public health; how the associate will support the local agency public health priorities.

Define overall requirements of the assignment and proposed activities including a detailed listing of related tasks, outcomes and expected deliverables, and projected timeline for completion. Demonstrate how the overall assignment aligns with PHAP goals and objectives.

Demonstrate how the assignment will support the competency development of the associate, and opportunities for ongoing professional development.

Supervision

Demonstrate the ability to provide full-time staff actively engaged in the day to day programmatic activities of the associate.

Provides appropriate levels of coaching, guidance, mentorship, direction, guidance, and professional development to entry level public health associate.

Meet regularly with associate (minimum of 10% of time) to assign task and review assignment status, plan work schedule, communicate performance expectations and monitor work progress and output.

Actively engage and partner with CDC supervisor and other PHAP program staff to ensure success of assignment, including participation in site visits.

Training

Provide training opportunities that develop skills relevant to PHAP competencies.

Identify and provide training directly related to the host site application and include timeline.

Provide a broad range of training opportunities to support and foster ongoing professional growth and development including but not limited to: traditional classroom training, online courses, job shadowing, and attendance at meetings or conferences.

The host site is responsible for all costs associated with the professional development of PHAP associates.

Host Site Information

Identify (list) and describe the public health issue/initiative or program management need(s) to be addressed by the PHAP associate.

Describe the program area, department, or organizational unit within the health agency where the assignment will be based.

Describe the populations served and identify the population the associate will work with (e.g., older adults, infants or children, at-risk populations)

Describe how hosting an associate will benefit your Public Health Agency, the associate, and the CDC.

Assignment matches are based on programmatic needs and requirements and geographical distribution.

Continue

*Note: Instructions and information are tailored to each fellowship program's information.

Competencies

Select all competencies that apply. You must select at least one competency.

Analytic and Assessment Skills

- Monitors health risks and factors affecting the community
- Uses data that is valid and reliable for assessing the health of a community
- Synthesizes public health information to accurately assess problems
- Applies ethical principles in using (e.g. accessing, analyzing, using, maintaining, and disseminating) public health data and information
- Uses information technology in accessing, collecting, analyzing, using maintaining, and disseminating data and information
- Defends decisions using logic as well as qualitative and quantitative data

Public Health Science Skills

- Applies knowledge of various approaches to improving population-based health
- Describes the basic public health sciences (i.e., laboratory, epidemiology, surveillance, and informatics)
- Describes how public health sciences are used in the delivery of the 10 Essential Public Health services
- Incorporates public health informatics practices and procedures
- Defines the roles, responsibilities and contributions of various organizations and agencies to specific federal, state, tribal, local and territorial public health programs
- Describes public health as part of a larger inter-related system of organizations that influence the health of populations at local, national, and global levels

Add Activity

Competencies

Select all competencies that apply. You must select at least one competency.

Program Planning, Management, and Improvement Skills

- Identifies information required in the program planning process
- Gathers information for evaluating policies, programs, and services
- Contributes to implementation of organizational strategic plan
- Contributes to state/tribal/community health improvement planning

Public Health Policy and Law Skills

- Describes the public health laws and regulations governing public health programs
- Adheres to laws, regulations, policies and procedures for ethical public health practice
- Analyzes public health legislation, policy, and regulation issuances that impact public health

Professionalism Skills

- Treats others courteously and respectfully
- Exercises initiative, persistence, tact, and resourcefulness in establishing and continuing work relationships
- Elicits and applies feedback to build professional skills and competencies
- Makes decisions focused on desired results
- Uses the chain of command to address risks, issues or concerns

Communication Skills

- Communicates in writing and orally to target audience with linguistic and cultural proficiency
- Communicates information that is clear, current, factual and uses plain language
- Conveys data and information to professionals and the public using a variety of approaches (e.g., reports, presentations, email, letters, press releases)
- Applies communication and group dynamic strategies in interactions with individuals and groups
- Demonstrates active listening skills

Diversity and Inclusion Skills

- Incorporates strategies for interacting with persons from diverse backgrounds
- Recognizes the ways diversity influences policies, program, and the health of a community
- Uses cultural and social aspects to increase an intervention's effectiveness
- Develops and maintains relationships with diverse partners to improve population-based health

Community Dimensions of Public Health Skills

- Establishes relationships to improve health in a community (e.g. partnerships, academic, colleagues, customers, others)
- Collaborates with community partners to improve health in a community
- Serves as public health ambassador
- Identifies policies, programs, and resources that improve health in a community (e.g., using evidence to demonstrate the need for a program, communicating the impact of a program)

Financial Planning and Management Skills

- Describes public health funding mechanisms
- Provides assistance on grants, cooperative agreements, contracts, and other awards to assist in meeting objectives
- Describes components of a budget
- Tracks program spending to current and forecasted budget constraints

* **Dedicated Resources:**

Enter a detailed description of the dedicated resources. (250 Word Limit).

10 APPENDIX A – E-MAILS

10.1 Applicant Registration Confirmation

Dear \$strFname\$ \$strLname\$:

You are successfully registered as an applicant for \$strAddressText\$. Below is the login information for you to login:

Your log-in:

E-mail: **\$strEmail\$**

Temporary password: **\$pw\$**

\$strAddressText\$: [\\$strAddress\\$](#)

Please do not reply to this e-mail. This e-mail address is not monitored.

CONFIDENTIALITY NOTICE: This electronic mail may contain information that is privileged, confidential, or otherwise protected from disclosure to anyone other than its intended recipients. Any dissemination or use of this electronic mail or its contents by persons other than the intended recipients is strictly prohibited. If you have received this communication in error, please delete the original message.

10.2 Applicant Reset Password Information

Dear \$strFname\$ \$strLname\$:

This e-mail provides your \$strProgramName\$ login information.

E-mail: **\$strEmail\$**

Temporary password: **\$pw\$**

\$strProgramName\$: [\\$strAddress\\$](#)

Please do not reply to this e-mail. This e-mail address is not monitored.

CONFIDENTIALITY NOTICE: This electronic mail may contain information that is privileged, confidential, or otherwise protected from disclosure to anyone other than its intended recipients. Any dissemination or use of this electronic mail or its contents by persons other than the intended recipients is strictly prohibited. If you have received this communication in error, please delete the original message.

10.3 **Application Submission Confirmation**

Dear strFname strLname,

Thank you for submitting your host site application for the Public Health Associate Program (PHAP). We have received your application and must receive the supporting document (Agreement to Detail) by strSubmissionDate. Host sites must have a signed copy of this document on file at CDC prior to the start date of the assigned Associate.

You may track receipt of documents and the status of your application online at: InternetWebAddress.

Please have your supporting documents mailed directly to:

Public Health Associate Program

Any dissemination or use of this electronic mail or its contents by persons other than the intended recipients is strictly prohibited. If you have received this communication in error, please delete the original message.

11 APPENDIX B – EXAMPLE AGREEMENT TO DETAIL

**AGREEMENT TO DETAIL
FEDERAL CIVIL SERVICE PERSONNEL
PUBLIC HEALTH ASSOCIATE PROGRAM (PHAP)
To State, Tribal, Local, or Territorial Host Agency**

Pursuant to section 214 of the Public Health Service Act (42 U.S.C. § 215), the Centers for Disease Control and Prevention (hereinafter CDC) hereby agrees to the request for detail of CDC civil service personnel (hereinafter associate) to state and local public health agencies (hereinafter “host agency”) as specified below. This agreement is for the Public Health Associate Program (PHAP).

I. JUSTIFICATION FOR DETAIL ASSIGNMENT

- A. The detail of CDC civil service personnel will assist CDC and host agency in carrying out disease prevention, health promotion and protection, and other public health activities.
- B. Associate(s) will provide assistance to host agency in developing, implementing, and evaluating public health programs.
- C. Associate(s) will promote and enhance state, tribal, local and territorial capacity.

II. OBJECTIVES FOR DETAIL ASSIGNMENT

- A. To provide opportunities to expand and enhance the skills and development of CDC associates assigned to host agency.
- B. To contribute to overall state, tribal, local and territorial health goals in support of national health.
- C. To reduce the incidence of disease and injury, disability and death.
- D. To strengthen federal, state and local capacity to prepare for, detect, report, respond to, contain and recover from public health effects of terrorism and other public health emergencies.

III. POSITION DATA AND SUPERVISION

CDC is responsible for the selection and supervision of associates in accordance with CDC recruitment, hiring, and merit promotion policies, regulations, and requirements.

A. The host agency shall provide a work environment free of verbal, written, or physical conduct that has the purpose or effect of unreasonably interfering with the associate’s performance or that creates an intimidating, hostile, or offensive environment. The host agency shall abide by all federal laws and regulations applicable to workplace conduct.

B. The host agency will provide the associate(s) with work space equipped with resources and materials that will provide the associate(s) with access to communications equipment (e.g.,

computers, electronic mail, telephone and facsimile machines) to allow them to maintain regular contact with CDC and for routine business purposes. This includes ensuring that associates have access to CDC secure systems through the host site computer network/firewall.

C. The host agency will immediately report any workplace incident to the CDC PHAP Supervisor. This includes associate exposure or injury, breach of security policies, or IT security issue.

D. Associates will have the same rights, responsibilities, and supervision as comparably situated employees of the host agency including receiving reimbursement for local travel expenses, participating in host site training, and receiving technical direction and mentoring from host site employees.

E. CDC will provide broad guidance, technical consultation, and official supervision to associate(s). Furthermore:

1. Each associate's performance will be formally assessed by CDC in accordance with established CDC performance management systems for civil service employees. In completing an associate's evaluations (both at end-of-year and at mid-year) CDC will solicit input from appropriate host agency staff regarding the associate's performance. Performance evaluations will include an assessment of the associate's achievement of required program competencies.

2. Host agency officials may make recommendations to CDC officials regarding any formal recognition that the employee would be eligible to receive based on performance or contributions to the program in accordance with the federal compensation guidelines.

3. Any publication that includes the name of a CDC associate must be submitted for and receive CDC clearance **prior to submission for publication**. The publication should include the associate's CDC affiliation as well as local affiliation with his/her name. Standard CDC guidelines for authorship should be followed when determining whether a CDC associate's name should be included as an author on a publication (General Administration No. CDC-69).

4. Any request by an associate for approval of work outside his/her current job and assignment must be submitted in writing through both the associate's host agency supervisor and his/her most immediate CDC supervisor to the appropriate management level at CDC.

5. The CDC will ultimately be responsible for rendering any appropriate disciplinary action that host agency proposes against an associate.

6. The host agency supervisor will work closely with associate to resolve any routine questions or issues that arise regarding the assignment or the associate's performance.

7. The host agency will promptly advise CDC of any serious performance or behavioral concerns about an associate. In these cases, host agency and CDC staff will work together to attempt to resolve such concerns with the associate, either informally or formally,

depending upon the nature of the concern. Other CDC resources may be called upon by the immediate supervisor to help resolve the issues.

8. If informal and/or formal efforts fail to resolve a problem, the host agency may request the removal of an associate. Such request must be forwarded, in writing, through the senior management of the host agency to the CDC PHAP Director and must state: 1) a substantive basis for the request, 2) efforts taken by host agency otherwise resolve the problem, and 3) the proposed date for the removal (not less than 90 days from the date of the request). Upon receipt of such a request, CDC will take appropriate action in consultation with host agency and the associate.

9. CDC may mobilize an associate during an emergency response to act as a CDC responder, either in the field or a CDC-site. During these emergency responses, CDC will inform the host agency of the activation of the associate for the emergency response, the anticipated duration of the associate to the emergency response efforts and will be responsible for all supervision, training and travel costs related to CDC emergency response mobilization.

a. This section does not apply to situations where an associate is acting for the host site in an emergency response situation.

b. CDC may supersede a host agency in mobilizing an associate for emergency response in a state or with a host agency.

IV. COSTS

A. Projected costs for associate(s)' salary, fringe benefits, and related expenses will be budgeted annually by CDC.

B. Expenses incident to the associate(s)' employment and travel will be paid as follows:

1. Pay and allowances will include, but will not be limited to, premium pay (e.g., holiday and overtime pay, see #3 below), CDC's share of costs for health benefits, group life insurance, and civil service or social security retirement coverage, and any out-of-state travel by any associate, or any in-state travel **required by CDC**.

2. An associate's salary will be paid on a biweekly basis. Payment for Civil Service employees will be dependent on the timely receipt of the appropriate time and attendance reports associate is required to submit to his/her CDC timekeeper. Payment will be issued by the CDC in accordance with federal rules and procedures.

3. Premium pay for overtime worked by Civil Service must be approved in advance by the appropriate management staff within CDC. Associate(s) must complete and submit the necessary paperwork in advance of the overtime before any payment will be authorized.

4. Individual performance ratings will serve as the basis for recommending with-in grade salary increases and merit pay increases for Civil Service employees. A year one associate

with a minimum of a fully successful (or equivalent) rating, will receive a promotion in year 2.

5. Any in-state or local travel by an associate that is required by host agency will be paid by host agency. This includes reimbursement for expenses related to host site required or sponsored training. CDC required training will be supported by CDC.

V. LEAVE AND HOURS OF DUTY

A. Civil Service associate(s) are required to work an 80-hour pay period. Hours of duty will be determined by host agency. Associate(s) are allowed federal holidays only.

B. On all Federal holidays that are not also holidays at the host agency, the host site should determine whether the associate(s) is performing essential duties that require him/her to report for duty. If the host site determines that the associate needs to work on a federal holiday, the associate should request prior approval from their CDC PHAP Supervisor. Associates working on a federal holiday will receive premium pay, therefore, this option should be used with discretion due to the financial impact.

C. On any Local holiday that is not a Federal holiday (as per the Federal Holiday schedule), Associate(s) are required to do one of the following:

a. The Associate(s) may take leave, with proper approval, on the Local holiday;

b. The Associate(s) may work a modified schedule during the 80-hour work period to “make up” the Local Holiday day (e.g. – associate would have the local holiday but work additional hours during the two week federal pay period to fulfill the 80 hour requirement);

c. The Associate(s) may complete PHAP required tasks (online training, assist CDC PHAP team with projects) or other local agency work on a telework basis.

d. Either choice would be reviewed with the Associate’s CDC supervisor. Prior written approval must be given by the associate’s federal supervisor.

D. Associate(s) will be entitled to use annual and sick leave in accordance with Federal laws, regulations, and procedures. Associates may also earn or use overtime, compensatory time, or credit time in accordance with Federal laws, regulations, and procedures, but approval of such must be consistent with local pay and leave management policies and procedures of the host agency. A request for leave should be reviewed and initialed by an associate’s on-site supervisor

Final written approval for leave (signature on leave slips) is the responsibility of the associate’s Federal supervisor. Each associate’s leave records will be maintained by his/her Federal supervisor.

VI. APPLICABILITY OF RULES, REGULATIONS, AND POLICIES

A. Rules and policies of the host agency shall apply to associate(s) except in cases where this agreement provides otherwise.

B. Where there is a conflict between the rules, regulations, and policies of host agency and/or the locality regarding the legal status and/or rights of associate and the rules, regulations, and policies of CDC or the Federal government regarding the same issue, the CDC or Federal standards will prevail.

C. Associate(s) may not engage in any political activities prohibited for Federal employees by the Hatch Act, 5 U.S.C. § 7321 et. seq., or that may be criminal offenses under title 18 of the U.S. Code (18 U.S.C. §§ 210, 211, 594, 595, 600, 601-607, 610).

D. The Standards of Conduct for Federal employees (5 CFR § 2635), HHS Supplemental Standards of Ethical Conduct (5 CFR § 5501), HHS Residual Standards of conduct (45 CFR § 73.735) and those for employees of host agency will both apply to associate(s), except as noted in item B, above.

VII. TRAINING

A. Associate(s) will be permitted to attend CDC-required programmatic and career development training, meetings, seminars and conferences (including national seminars and regional staff conferences). Absences for purposes of optional training or professional development will occur only with the mutual consent of the parties to this agreement.

B. The host agency may, at its discretion and expense, make available to associate(s) any training opportunities sponsored by the State or locality and made available to other host agency staff.

VIII. PERIOD OF DETAIL

A. The field assignments addressed by this agreement shall be of two year duration.

B. This agreement may be modified or terminated by mutual consent of the parties upon 90 days notice in writing by either party of its intent to modify or terminate the agreement.

C. The continuation of each associate's detail is contingent upon the availability of funds to support the detail.

IX. APPROVAL

A. The Undersigned represents CDC and is authorized to grant the detail or assignment for the purposes stated herein:

_____ [Signature] _____ Date: _____

_____ [Title – CDC Director or Designee] _____

B. The Undersigned represents the host agency and is authorized to request the detail of associate(s) for the purposes stated herein.

Host Site Signee

Competencies

Analytic and Assessment Skills

- Monitors community health risks
- Investigates community health problems
- Performs surveillance activities including data collection and analysis (e.g., collecting morbidity reports, NEDSS, NEPS, cancer registries)
- Uses technological information systems for public health application
- Disseminates information that is evidence-based and from professional sources
- Adheres to ethical principles in the collection, maintenance, use and dissemination of data and information

Program Planning Skills

- Identifies information required in the program planning process (e.g., expresses the problem statement)
- Gathers information for use by program officials to inform program planning decisions
- Participates in program planning processes (e.g., assists in the development of goals and objectives, timelines, resource needs, evaluations)
- Applies planning and program-specific implementation strategies to address public health needs (e.g., community blood screening, development of youth activity programs)

- Describes the public health laws and regulations governing public health programs

Communication Skills

- Demonstrates active listening skills
- Communicates in writing and orally to target audiences with linguistic and cultural proficiency
- Addresses sensitive issues with decorum, tact and diplomacy
- Responds to electronic, written, verbal and non-verbal communications with courtesy and respect
- Communicates information that is clear, current and factual
- Communicate strategies in forums or community meetings
- Applies communication and group dynamic techniques (e.g., principled negotiation, conflict resolution and risk communication) in interactions with individuals and groups

Cultural Competency Skills

- Recognizes the role of cultural, social and behavioral factors in the accessibility, availability, acceptability and delivery of public health services
- Uses colleagues diverse experiences as a resource to serve targeted populations
- Uses cultural and social aspects to increase an interventions effectiveness

Partnership and Collaboration Skills

- Identifies stakeholders, community assets and resources
- Educates community groups on health issues and solutions for public health initiatives (e.g., TB prevention practices, STD/HIV testing information)
- Develops working relationships with team members and colleagues within the public and private sectors for the purpose of improving public health
- Collaborates with community partners to promote the health of the population
- Describes the partnership between governmental, inter-governmental and non-governmental organizations in the delivery of community health services

Public Health Practice and Knowledge Skills

- Defines the roles, responsibilities and contributions of various organizations and agencies to specific federal, state, tribal, local and territorial public health programs
- Adheres to laws, regulations, policies and procedures for ethical public health practice (e.g., HIPAA, restaurant inspection policies, administrative codes)
- Identifies how work activities and skills relate to the Core Public Health Functions and Ten Essential Services of Public Health
- Describes the basic public health sciences (e.g., laboratory, biostatistics, epidemiology, environmental health sciences, health services administration and social and behavioral health sciences)

Financial Planning Skills

- Describes components of a budget
- Describes federal public health funding mechanisms

Leadership and Systems Thinking Skills

- Uses individual, team and organizational learning opportunities for personal and professional development
- Uses feedback received during peer review, mentoring and coaching opportunities for skill development
- Examines professional development plans on an ongoing basis with assigned supervisors to track knowledge increase and skill development
- Uses the chain of command at CDC and in the field to address issues or concerns
- Describes how public health operates within a larger system (e.g., political, health care)
- Describes how changes in the public health system in the larger social, political and economic environment impact organizational practices
