

Cancer Prevention Fellowship Program

Self-Directed Learning Program (SDLP)

June: Assess

Fellow completes competency self-assessment to identify gaps in knowledge and skills needed to launch programs of research at the NCI

July: Plan

Fellow submits a Fellow Learning Plan, a document that outlines learning goals and self-selected plans for meeting goals (i.e., courses, reading, presentations, informational interviews). CPFP SD reviews, provides feedback, and approves

September: Evaluate

Fellow reports the results of their SDL experiences through an online form and during a one-on-one interview with their CPFP SD

June: Introduce

Fellow attends session during an Orientation, which outlines SDLP justification, summarizes learning methodology, and addresses questions

June - July: Discuss

Fellow reviews results of self-assessment during a one-on-one meeting with CPFP Scientific Director (SD). Learning goals will be identified in the following categories: CPFP required goals, SD recommended goals, and personal goals

July - August: Learn

Working with CPFP Staff, Fellow registers for learning events and purchases learning materials. Fellow completes all elements on Fellow Learning Plan
