

Catheter-Associated Urinary Tract Infection (CAUTI) Validation Template

In support of validation for the Hospital Inpatient Quality Reporting Program for the Fiscal Year (FY) 2022 Payment Determination:

- Each hospital selected for CAUTI validation is to produce a list of positive urine cultures for intensive care unit (ICU) patients.
- The line list should include all **final results** for all positive urine cultures with $\geq 10^5$ colony-forming units (CFUs)/ml **collected during an ICU stay**.
- For each patient confirm:
 - 1) The patient had an ICU admission during this hospital stay; and
 - 2) The patient had a positive urine culture collected during the ICU stay with $\geq 10^5$ CFU/ml. **(If the patient was not in the ICU when the culture was drawn, do not include these on the Validation Template. Exclude positive cultures with more than 2 organisms present even if results are $\geq 10^5$ CFU/ml.)**
