

PRA Disclosure Statement The Transformed Medicaid Statistical Information System (T-MSIS) is used to assist the Centers for Medicare & Medicaid Services (CMS) with monitoring and oversight of Medicaid and CHIP programs, to enable evaluation of demonstrations under section 1115 of the Social Security Act and to calculate quality measures and other metrics, including those reported through the new Medicaid and CHIP Scoreboard. Section 4735 of the Balanced Budget Act of 1997 included a statutory requirement for states to submit claims data, enrollee encounter data, and supporting information. Section 6504 of the Affordable Care Act strengthened this provision by requiring states to include data elements the Secretary determines necessary for program integrity, program oversight, and administration. Under the Privacy Act of 1974 any personally identifying information obtained will be kept private to the extent of the law. According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-0345 (Expires: 07/31/2019). The time required to complete this information collection is estimated to average 10 hours per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1850.

Table of Validation Rule Categories

Validation Rule Categories	Count of Rule Ids
File specification errors	
Duplicate record identifier (RECORD-NUM or primary key values)	49
Subtotal: Number of file specification errors	49
Formatting Errors	
Value illegal for specified data type	1,401
Subtotal: Number of formatting errors	1,401
Relational errors	
Missing corresponding record (2 record types, multi file) (ex. missing eligibility record for claim header)	2
Missing parent record (single file)	4
Values inconsistently specified (multi record, single file)	168
Values inconsistently specified (multiple record types, multi file)	78
Values inconsistently specified (single record type, multiple records)	45
Values inconsistently specified (single record type, single record)	318
Subtotal: Number of relational errors	615
Value Errors	
Value does not match specification	248
Value not in specified valid value set	463
Value not valid for state-supplied format (format or valid values)	11
Subtotal: Number of value errors	722
