We are asking your permission to search state or local government records for child-care subsidy, Supplemental Nutritional Assistance Program (Food Stamps), TANF, WIC, Medicaid, or other programs that provide assistance to families. (SUGGESTED SCRIPT) State or local government program records can provide additional information about the child care and financial assistance for care that a child and his/her family may be receiving. (IF

NEEDED: For example, some pre-schools or after-school programs may be receiving government subsidies that parents are not aware of. These subsidies would be recorded in state program data on child care subsidies or such child care-related programs as Head Start or Universal Pre-Kindergarten.) NORC requests your permission to search child-care related government program records for information about your child or about the providers who serve your children. Even if your (child has/children have) not received subsidies or (has/have) never been in child care, it is still important for us to have your permission so that we can compare families like yours against those that do enroll in programs. We would not provide the state agency with any of the answers you've told me today, other than your name and the name(s) of your child/ren, and enough information to find them in state records.

All information about your child and your child's care provider will be considered private and used for study purposes only. Any names of children, as well as any names of childcare providers, will not be used in reporting the study results. We will never release any information that may identify you or your child. The information will be reported in statistical form to the U.S. Department of Health and Human Services as part of the results of this study.
