Respondent Wages (\$2016)	
Category (1)	Hourly Mean Wage (2)
Technical	\$48.62
Managerial	\$64.74
Clerical	\$48.62

Footnotes:

(1) These rates are from the United States Department of Labor, Bureau of Economic Analysis, "May 2016 National Industry-Specific Occupational Employment and Wages by Detailed Occupation". The rates are from column "Hourly Mean Wage".
https://www.bls.gov/oes/current/naics4_326100.htm

(2) Selected "mean hourly wage" in the table referenced in footnote 1.

(3) Loaded Wage is the 2016 Wage increased by 110 percent to account for fringe and overhead available to those employed by private industry.

EPA Wages (\$2016)	
Category (1)	Hourly Mean Wage (2)
(GS- 12, step 1) - Technical	\$30.05
(GS- 13, step 5) - Managerial	\$40.50
(GS-6, step 3) - Clerical	\$16.26

Footnotes:

(1) The hourly mean wage for each category is based on 2017 wages, as reported in the 2013 ICR amendment.
<https://www.opm.gov/policy-data-oversight/pay-leave/salaries-wages/>

(2) This value differs from the wages used in the 2013 ICR amendment because it includes 2016 rates of pay.

(3) Wage with fringe and overhead is the hourly mean wage increased for the benefit packages available to government employees.

H. Time for audits	N/A	
Subtotal for Recordkeeping Requirements		
TOTAL LABOR BURDEN AND COST (rounded)^a		
Capital and O&M Cost (see Section 6(b)(iii))		
GRAND TOTAL (rounded)^a		

Assumptions:

^a There is an average of 584 existing reinforced plastic composites facilities (or RPC) subject to NESHAP subpart WWWW. three year period of this ICR of which 93 percent (or 14.88) will consist of facilities with 4 groups of operations and 7 percent respondents per year over the next three year period of this ICR.

^b This ICR uses the following labor rates: \$129.93 per hour for Executive, Administrative, and Managerial labor; \$103.97 per United States Department of Labor, Bureau of Labor Statistics, June 2014, "Table 2: Civilian Workers, by Occupational and I increased by 110% to account for the benefit packages available to those employed by private industry.

^c New respondents have to comply with the initial rule requirements including notifications and performance tests. We have a therefore, will be require to conduct an initial performance test. We have assumed that performance tests are repeated by 20 p

^d Monitoring and recordkeeping of operations for respondents with enclosures and add-on control devices include: 1) specific start-up, shutdown, and malfunctions of equipment, and 3) work practices.

^e Monitoring and recordkeeping of operations for respondents that comply by limiting the HAP content of their raw materials material and the weighted-average HAP content over the past 12 months, and 2) work practices. However, if all the materials record HAP content and would not need to track monthly consumption or record the computations. For open molding and ce thirteen different processes (open molding) and two different processes (centrifugal casting to calculate the monthly average c casting operations).

^f We have assumed that approximately 80 percent of the 600 (or 480) existing respondents will report no excess emissions tw.

^g We have assumed that all RPC facilities with add-on controls (18 existing and 2 new each year or an average of 22) will ha the SSM plan.

^h New respondents (16) have to develop a record system. In addition, existing RPC facilities have to record operational data. centrifugal casting operations (452 existing and 14 new each year or an average of 480 per year) would have to record for low RPCs per year) would have to record add-on control devices operating parameters; and 3) all facilities (600) need to keep recce work practices are already monitored by industry for other purposes, we are not attributing these burdens to the rule.

ⁱ We have assumed that he amount of time it takes a respondent to train its employees would vary with the number of employ respondents would be identical to that of the existing PRC universe. Therefore, we have assumed that 82 percent of the respo 11 percent (i.e. 64.24 existing RPCs and 1.76 new RPCs per year), would be medium business, and 7 percent (i.e., 40.88 exist respondents will be providing full training to new employees only. Therefore, to train existing respondents, it will take 20 per

Notification of compliance status	2	1
Review reports of excess emissions ^c	4	2
Review reports of no excess emissions ^c	2	2
Review of startup, shutdown, malfunction report ^d	4	1
TOTAL ANNUAL BURDEN AND COST (rounded)		

Assumptions:

^a There is an average of 584 existing reinforced plastic composites facilities (or RPC) subject to NESHAP subpart WWWW. the three year period of this ICR. Therefore, there is an average of 600 total respondents per year over the next three year period. Of these respondents, 11 percent are medium size facilities and 7 percent are large facilities. Furthermore, we have assumed that 93 percent will consist of five groups of operations.

^b This cost is based on the following labor rates: Managerial rate of \$62.90 (GS-13, Step 5, \$39.31 + 60%), Technical rate of \$41.93 (GS-11, Step 5, \$25.58 + 60%). These rates are from the Office of Personnel Management (OPM), 2014 General Schedule, which excludes locality pay packages available to government employees.

^c We have assumed that approximately 80 percent (or 480) of the respondents will report no excess emissions twice a year and 20 percent (or 120) will report no excess emissions once a year.

^d We have assumed that all RPC facilities with add-on controls (18 existing and 2 new each year or an average of 22) will have a malfunction report according to the plan.

Activity	(A) EPA Hours per occurrence	(B) No of occurrences per year
1. Read instructions	N/A	
2. Enter and update information into agency recordkeeping system ^c	4	1
3. Notification review ^d		
a. Review initial notification for existing sources	N/A	
b. Notification for new major sources ^e	N/A	
c. Review request for compliance extension	N/A	
d. Review special compliance requirements	N/A	
e. Review initial performance test and test plan	N/A	
f. Review compliance status ^f	2	1
g. Area sources not subject to standard	N/A	
h. Review waiver application	N/A	
4. Reporting requirements		
a. Semiannual compliance reports for all sources ^g	4	2
TOTAL LABOR BURDEN AND COST (rounded) ^h		

Assumptions:

- ^a We have assumed that the average number of respondents that will be subject to the rule will be 448 existing sources. There
- ^b This cost is based on the following labor rates which incorporates a 1.6 benefits multiplication factor to account for governn Clerical rate. These rates are from the Office of Personnel Management (OPM) “2017 General Schedule”, which excludes loc
- ^c We have assumed that respondents will each take 4 hours to enter and update information into agency recordkeeping system
- ^d We have assumed that all existing sources will be in compliance in year one.
- ^e We have assumed that there will be not new sources over the three-year period of this ICR.
- ^f We have assumed that it will take 2 hours to review the compliance status notification.
- ^g We have assumed that it will take four hours two times per year to review the semiannual compliance report.
- ^h Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding

posites Production NESHAP (40 CFR Part 63, Subpart WWWW) (2018 RTR)
