[1] All transactions involving exposure to more than one currency, whether in interest rates or exchange rates. [2] Only transactions which are included in the columns "other" in tables A1, A2, and "residual" in table A2. Trades involving the domestic currency, the USD, the EUR or the JPY in one leg, and any of the currencies listed in this table in the other leg, should be allocated to the relevant currency column in this table once; these deals should correspond to the ones reported in columns "other" of tables A1 and A2. Trades between any two currencies listed in this table should be reported in both relevant currency columns, thus summing to 200% of the deal; these trades should correspond to the ones reported in column "residual" in table A2. **Currencies subject to compulsory reporting have been marked in blue.** [3] Excluding "tomorrow/next day" transactions. [4] Including non-deliverable forwards and other contracts-for-differences. [5] Data should only be provided for the "total" column. [6] A swap is considered to be a single transaction in that the two legs are not counted separately. Includes "tomorrow/next day" transactions.

o/w related party trades [8]																								FXDMDG38

[1] All transactions involving exposure to more than one currency, whether in interest rates or exchange rates. [2] "Other" covers currencies that are included in the Triennial but not explicitly listed in each column of this table. See also table A6 for a more detailed breakdown of total turnover in "other" currencies. [3] "Residual" covers all currency pairs except those involving the domestic currency, the USD, the EUR, and the JPY. [4] Covers the sum of the totals in tables A4, A5 and the column "Residual". [5] A swap is considered to be a single transaction in that the two legs are not counted separately. Includes "tomorrow/next day" transactions. [6] Including currency warrants and multicurrency swaptions. [7] Any instrument where the transaction is highly leveraged and/or the notional amount is variable and where a decomposition into individual plain vanilla components is impractical or impossible. [8] Trades between desks and offices, and trades with own branches and subsidiaries and between affiliated firms (regardless of whether the counterparty is resident in the same country as the reporting dealer or in another country). Back-to-back deals and trades to facilitate internal bookkeeping and internal risk management within a given institution are not to be reported in the context of the triennial survey.

[1] All transactions involving exposure to more than one currency, whether in interest rates or exchange rates. [2] Only transactions which are included in the columns "other" in tables A4, A5, and "residual" in table A5 . Trades involving the domestic currency, the USD, the EUR or the JPY in one leg, and any of the currencies listed in this table in the other leg, should be allocated to the relevant currency column in this table once; these deals should correspond to the ones reported in columns "other" of tables A4 and A5. Trades between any two currencies listed in this table should be reported in both relevant currency columns, thus summing to 200% of the deal; these trades should correspond to the ones reported in column "residual" in table A5. **Currencies subject to compulsory reporting have been marked in blue**. [3] A swap is considered to be a single transaction in that the two legs are not counted separately. [4] Including currency warrants and multicurrency swaptions.
