- If these do not match, go back to your list of fields.
- Go through all fields listed until you find one that matches the sampled region.
- If you still don't find a matching field, ask the operator if he has ANY fields that might fall in the sampled region.
- Use the first field you find that is in the correct region. If that region is one of the original 18, enter its number for the selected field.
- Otherwise, enter '19' for the selected field. Be sure to correct the entries in the field number, IRA, and Region boxes above.
- If the farmer does not have any such fields, either listed or not, you may proceed with the originally selected field.

- Is 2017 crop harvested on this field listed on page 9?
- Lime: If lime application is not listed in Cropping Practices Section, please verify that no lime was applied.
- Is row spacing and number of rows entered with the planting operation in the Cropping Practices Section?
- Is the seed type and amount planted in the selected field entered with the planting operation in the Cropping Practices Section? Be sure that the seed listed in Section C matches one of the categories indicated in question B2.
- Fertilizer:** If there is no fertilizer application listed in the Cropping Practices Section, please verify that no fertilizer was applied.
- Herbicide:** If there is no herbicide application listed in the Cropping Practices Section, please verify that no herbicides were applied.
- Insecticide:** If there is no insecticide application listed in the Cropping Practices Section, please verify that no insecticides were applied.
- If field was irrigated, please check that all irrigation activities are listed in Section C.
- Harvest:**
- Did producer specify a harvest date?
- Did producer combine/pick  **or** custom harvest ?
- Did custom harvest include hauling cost?
- Did producer list additional harvest equipment? (For example: boll buggy, module builder, grain cart, etc.)
- Post Harvest Operations 2018:**

Name and Address Label
------------------------

Please verify that you received an average yield in bushels of soybeans for oilseed in **Section B, question 4**. If the operator is not able to estimate yield at this time, you will need to re-contact the operator at a later date for the yield information. First, get the operator's best estimate of what date would be best to call or return for the yield information, and put that date in the box directly below.

Call/come back on [enter date] _____ / _____ / _____ for yield.
---

Then, copy irrigated acres from **Section B**, question 1a, in the space below for irrigated acres. Next compute non-irrigated acres as total soybeans for oilseed acres (**Section A**, question 3) minus irrigated acres, and write these non-irrigated acres in the space for non-irrigated acres. Check the box in front of each line that has positive acres. Do not complete Respondent, Enumerator, or Date (at the bottom) at this time. Cut this page out of the questionnaire and send the rest of it to your supervisor for review. Keep this page until you obtain yield(s), then fill it out and return it to the state office. Remember when collecting yield data that the yield refers to **ALL** harvested soybeans for oilseed acreage, not just the selected field.
