## **BACK OF FLYERS**

The voluntary groundfish tag recovery program is part of the fishery resource assessment that the National Marine Fisheries Service (NMFS) conducts under the Magnuson-Stevens Act authority as codified in 16 U.S.C. 1854 (e) and 1801 (a)(8). Tag returns provide essential biological and movement information used in groundfish stock assessment. Public reporting burden for this collection is estimated to average 5 minutes per response (20 minutes for electronic tags), including the time for reviewing instructions, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the address above. Information you provide is treated as confidential per Section 402(b) of the Magnuson-Stevens Fishery Conservation and Management Act and NOAA Administrative Order 216-100, "Confidentiality of Statistics". Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act, unless that collection of information displays a currently valid OMB Control Number.
