If you are conducting a focus group, survey, or plan to employ statistical methods, please provide answers to the following questions:

The selection of your targeted respondents

1. Do you have a customer list or something similar that defines the universe of potential respondents and do you have a sampling plan for selecting from this universe?

Yes No

If the answer is yes, please provide a description of both below (or attach the sampling plan)? If the answer is no, please provide a description of how you plan to identify your potential group of respondents and how you will select them?

We have a listserv that we can use to contact potential survey respondents. The listservs are relatively small (~3000). We will send the surveys to all members of the listserv, so we do not have a sampling plan. We expect a response rate between 10 and 20% for surveys on use of newsletters and podcasts and as high as 50% for webinar participants. Information on responses rates is wide and varied. The actual response rate may be greater (or lower) than our estimate.

Administration of the Instrument

1. How will you collect the information? (Check all that apply)
 - Web-based or other forms of Social Media
 - Telephone
 - In-person
 - Mail
 - Other, Explain
2. Will interviewers or facilitators be used? Yes No

Please make sure that all instruments, instructions, and scripts are submitted with the request.
