TOTAL LABOR BURDEN AND COST (rounded) ⁱ					
TOTAL CAPITAL AND O&M COSTS (rounded)ⁱ					
GRAND TOTAL (rounded): ⁱ					

Assumptions:

- ^a We have assumed that the average number of respondents potentially subject to this rule is 45. There will be one addition
- ^b This ICR uses the following labor rates: \$147.40 per hour for Executive, Administrative, and Managerial labor; \$117.92 per hour for Clerical labor. These rates are from the United States Department of Labor, Bureau of Labor Statistics, June 2
- ^c We have assumed that it will take 0.87 hours for a new respondent to read instructions.
- ^d We have assumed that 20 percent of respondents will have to repeat performance tests because of failure.
- ^e We have assumed that each source submits one excess emission report every year, in addition to the required semiannual

^f We have assumed that 80 percent of sources will use incineration to control emissions.

^g We assume that each respondent will take 0.87 hours once per month to record performance test.

^h We assume that each respondent will take 0.22 hours 250 time per year to record operating parameters.

ⁱ Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.

TOTAL ANNUAL LABOR BURDEN AND COSTS (rounded)^g					

Assumptions:

^a We have assumed that the average number of respondents potentially subject to this rule is 45. There will be one additional respondent for each plant.

^b Labor rates for Federal agency personnel were applied to State/Local agencies, and are based on the average hourly rate for Federal employees: Managerial \$65.71 (GS-13, Step 5, \$41.07 + 60%); and Clerical \$26.38 (GS-6, Step 3, \$26.38 + 60%). This ICR assumes that 80 percent of sources use incineration. Managerial hours are 5 percent of Technical hours, and Clerical hours are 10 percent of Technical hours. These rates are based on the average hourly rate of pay, which excludes locality rates of pay. The rates have been applied to local agencies and have been increased by 60 percent to reflect the locality rates available to government employees.

^c We assume that each of the new facilities will submit initial notifications.

^d We assume that each source submits one excess emission report every year, in addition to the required semiannual reports.

^e We assume that 80 percent of sources use incineration.

^f We assume that temperature reports are conducted two times per year.

^g Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.
