Rebate Reservation: Checklist

The following checklist provides a list of affirmation statements indicating your understanding of the legal and program requirements that must be met in order to participate in the General Aviation ADS-B Rebate program.

All boxes must be checked in order to request a rebate reservation.

Am I Eligible?

- * I understand that by providing my information, it will be used for the purposes of verifying eligibility for participation in and processing of data for GA Rebate provisioning as well as ongoing communications with the DOT/FAA. This information will be retained in DOT Privacy Act System of Records, DOT/FAA-801, Aircraft Registration Records System of Records Notice (<https://www.gpo.gov/fdsys/pkg/FR-2015-12-15/pdf/2015-31647.pdf>).
- * My aircraft is US registered in the FAA Civil Aircraft Registry.
- * My aircraft is registered as a fixed-wing, single-engine piston aircraft.
- * My aircraft was manufactured prior to January 1, 2016. New production aircraft are not eligible.
- * I am not upgrading the software of existing ADS-B equipment.
- * I will install Technical Standard Order (TSO)-certified ADS-B avionics on or after 04/02/2016; aircraft detected with ADS-B Version 2 avionics prior to this date are not eligible.
- * I intend to permanently install new TSO-certified avionics in a single aircraft in compliance with applicable FAA regulations within 90 days of reservation.
- * The FAA has not paid to upgrade or previously committed to upgrade my aircraft.
- * I understand that I may be fined or imprisoned if I obtain a rebate reservation by knowingly and willfully falsifying or concealing a material fact, or making a false, fictitious or fraudulent statement.

Public ADS-B Performance Report Request

Flight Standards provides this automated tool in order to assist aircraft owners, operators, and avionics shops with the validation of the performance of the ADS-B Out equipment installed on aircraft. Public ADS-B Performance Reports (PAPR) may be requested for aircraft operations that were detected within FAA ADS-B Coverage areas. For best results, ADS-B validation flights should be conducted within published areas of FAA ADS-B Coverage. Flying near the surface or at the fringe of ADS-B coverage areas may negatively impact the metrics provided in your PAPR Report. Please refer to the [FAA ADS-B Coverage Map](#) before flying.

The tool requires the following information:

- The date at the start of your flight of interest. This is entered as the date recorded in **Zulu Time (UTC+0)** at the start of the flight.
- A way to identify your aircraft. This may be entered as the aircraft's tail number (US registered aircraft only) or the ICAO Address of the aircraft in hex, octal, or decimal format.
- Your name and a valid email address to send your requested report.
- The configuration of the ADS-B OUT equipment installed on the aircraft. There are selection lists below for common equipment and a notes area if you do not find your specific equipment.

Using the above information, the tool will search through its inventory of past aircraft operations for a flight meeting the selections. If a flight with matching identification can be located on the requested date, a Public ADS-B Performance Report will be sent to the supplied email address. PAPR reports are typically delivered within 30 minutes.

Successful report processing depends on the accuracy of the information provided. All fields should be completed and verified prior to submitting your request.

Please provide the date at the start of your flight referenced to Zulu Time (UTC+0).
