**SUPPLEMENTARY INFORMATION:**

**Background**

This National Telecommunications and Information Administration cybersecurity multistakeholder process focuses on promoting software component transparency. Most modern software is not written completely from scratch, but includes existing components, modules, and libraries from the open source and commercial software world. Modern development practices such as code reuse, and a dynamic IT marketplace with acquisitions and mergers, make it challenging to track the use of software components. The Internet of Things compounds this phenomenon, as new organizations, enterprises, and innovators take on the role of software developer to add "smart" features or connectivity to their products. While the majority of libraries and components do not have known vulnerabilities, many do, and the sheer quantity of software means that some software products ship with vulnerable or out-of-date components.

The first meeting of this multistakeholder process was held on July 19, 2018, in Washington, DC.<sup>1</sup> Stakeholders presented multiple perspectives, and identified several inter-related work streams: Understanding the Problem, Use Cases and State of Practice, Standards and Formats, and Healthcare Proof of Concept. Since then, stakeholders have scoped their work streams and have begun developing products such as guidance documents. NTIA acts as the convener, but stakeholders drive the outcomes. Success of the process will be evaluated by the extent to which broader findings on software component transparency are implemented across the ecosystem.

The main objectives of the April 11, 2019, meeting are to share progress from

the working groups and hear feedback from the broader stakeholder community. Stakeholders will also discuss how the outputs of the different work streams can complement each other, and identify further issues to pursue. More information about stakeholders' work is available at: <https://www.ntia.gov/SoftwareTransparency>.

**Time and Date:** NTIA will convene the next meeting of the multistakeholder process on Software Component Transparency on April 11, 2019, from 10:00 a.m. to 4:00 p.m., Eastern Time. Please refer to NTIA's website, <https://www.ntia.gov/SoftwareTransparency>, for the most current information.

<sup>1</sup>Notes, presentations, and a video recording of the July 19, 2018, kickoff meeting are available at: <https://www.ntia.gov/SoftwareTransparency>.

in 44 U.S.C. 3502(3) and 5 CFR 1320.3 and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA, 44 U.S.C. 3506(c)(2)(A), requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, the CFTC is publishing notice of the proposed collection of information listed below.

*Title:* Regulation 16.02 Daily Trade and Supporting Data Reports (OMB Control No. 3038–0061). This is a request for extension of a currently approved information collection.

*Abstract:* Commission Rule 16.02 requires Reporting Markets to report transaction-level trade data and related order information for each executed transaction. The Commission uses the transaction-level trade data and related order information to discharge its regulatory responsibilities, including the responsibilities to prevent market manipulations and commodity price distortions and ensure the financial integrity of its jurisdictional markets.

With respect to the collection of information, the CFTC invites comments on:

- Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have a practical use;
- The accuracy of the Commission's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Ways to enhance the quality, usefulness, and clarity of the information to be collected; and
- Ways to minimize the burden of collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology; *e.g.*, permitting electronic submission of responses.

You should submit only information that you wish to make available publicly. If you wish the Commission to consider information that you believe is exempt from disclosure under the Freedom of Information Act, a petition for confidential treatment of the exempt information may be submitted according

to the procedures established in § 145.9 of the Commission's regulations.<sup>1</sup>

The Commission reserves the right, but shall have no obligation, to review, pre-screen, filter, redact, refuse or remove any or all of your submission from <http://www.cftc.gov> that it may deem to be inappropriate for publication, such as obscene language. All submissions that have been redacted or removed that contain comments on the merits of the ICR will be retained in the public comment file and will be considered as required under the Administrative Procedure Act and other applicable laws, and may be accessible under the Freedom of Information Act.

*Burden Statement:* The Commission is revising its burden estimate for this collection. The Commission estimates that up to 15 Reporting Markets could provide daily trade and supporting data reports to the Commission in the future. The CFTC believes that Reporting Markets incur an average burden of two hours to compile and submit each report made pursuant to Commission Rule 16.02. Reporting Markets submit an average of 250 reports annually. The estimated total annual time-burden for all Reporting Markets is 7,500 hours. The respondent burden for this collection is estimated to be as follows:

*Estimated Number of Respondents:* 15.

*Estimated Average Burden Hours Per Respondent:* 500 hours.

*Estimated Total Annual Burden Hours:* 7,500 hours.

*Frequency of Collection:* Daily.

There are no capital costs or operating and maintenance costs associated with this collection.
