

OMB Control Number: 0583-0153.

Title of Clearance: Public Health Information System.

Agency Form Numbers affected by Change Justification: Hours of Operation (Form 5200-15) and Application for Export Certificate (Form 9060-6)

FORM 5200-15 Change Summary: FSIS Form 5200-15, Hours of Operation, is submitted when an establishment wants to notify the Agency of a change in its hours of operation, or a new establishment is seeking approval for hours of operation. (9 CFR 307.4, 381.37, 590.124, & 592.96).

FSIS is proposing to simplify the form to allow only one starting time per shift in establishments that have both slaughter and processing departments. This results in the elimination of two block schedules from the form.

In addition, for administrative purposes, FSIS is proposing to add:

- the establishment number in Block 1;
- an email address in Block 4;
- the physical location of the establishment in Block 5;
- check boxes for “types of inspection,” “exempt activities” and “jurisdiction;” and
- a voluntary comment box for any additional information

These additions do not constitute a new information collection. The FSIS Form 5200-2, Application for Federal Inspection, includes the same check boxes in Block 3, Block 19C and Block 19D. The establishment provides this information in the FSIS Form 5200-2. The addition of these check boxes on FSIS Form 5200-15 is necessary so that the Front Line Supervisor and the establishment can separate official (inspected) operations from unofficial (exempt/FDA/retail) operations.

There is no estimated burden change for the form.

FORM 9060-6 Change Summary: FSIS Form 9060-6, Application for Export Certificate, is currently approved for the export of meat and poultry products. This form provides FSIS with important data necessary to facilitate the export of product (9 CFR 322.2 & 381.105).

FSIS is proposing to add continuation sheets for capturing additional products, statements or remarks that will not fit in the product grid or remarks section on the first page. These continuation sheets provide extra space, and are added as pages 2 and 3 before the instructions on this form.

There is no estimated burden change for the form.
