PRETEST STUDY PROBES (For Pretest Only)

We are interested in what you thought about the ad that you saw. We'll look at a playback of your eye information while you looked at the drug ad. We just want to learn a little more about what drew your attention and why. There are no right or wrong answers.

Do you have any questions before we begin?

[Start gaze replay; stop and probe based on participant's ad viewing.]

[For participants whose eye tracking information shows they did not look at the ISI at all, or any specific area within the ISI, i.e. contraindications, most severe side effects.]

P1. Your vision (eye tracking) information shows that you spent less time looking at [FILL WITH AD ELEMENT(S) WITHIN THE ISI THAT PARTICIPANT SPENT EITHER NO OR RELATIVELY LITTLE TIME LOOKING AT]. Can you tell me about that?

[IF NEEDED]:

• Why did that draw your attention?

[For participants whose eye tracking information shows they spent time looking at ad elements unrelated to risks.]

P2. Your vision (eye tracking information) shows that you looked at [FILL WITH DESCRIPTION OF WHAT P LOOKED AT]. Can you tell me more about that? Why did that get your attention more than [FILL WITH ISI DESCRIPTION]?

[IF NEEDED]:

• Why did that draw your attention?

[For participants in a brief summary condition, if their eye tracking information shows they did not look at the brief summary.]

P3. Your vision (eye tracking) information shows that you spent {less/only a very brief time} time looking at this page. Can you tell me about that?

P4. Thinking about the questions that were presented following the ad, was there anything that stood out to you as confusing or anything that you did not understand?

PRETEST STUDY PROBES (For Pretest Only)

We are interested in what you thought about the ad that you saw. We'll look at a playback of your eye information while you looked at the drug ad. We just want to learn a little more about what drew your attention and why. There are no right or wrong answers.

Do you have any questions before we begin?

[Start gaze replay; stop and probe based on participant's ad viewing.]

[For participants whose eye tracking information shows they did not look at the ISI at all, or any specific area within the ISI, i.e. contraindications, most severe side effects.]

P1. Your vision (eye tracking) information shows that you spent less time looking at [FILL WITH AD ELEMENT(S) WITHIN THE ISI THAT PARTICIPANT SPENT EITHER NO OR RELATIVELY LITTLE TIME LOOKING AT]. Can you tell me about that?

[IF NEEDED]:

• Why did that draw your attention?

[For participants whose eye tracking information shows they spent time looking at ad elements unrelated to risks.]

P2. Your vision (eye tracking information) shows that you looked at [FILL WITH DESCRIPTION OF WHAT P LOOKED AT]. Can you tell me more about that? Why did that get your attention more than [FILL WITH ISI DESCRIPTION]?

[IF NEEDED]:

• Why did that draw your attention?

[For participants in a brief summary condition, if their eye tracking information shows they did not look at the brief summary.]

P3. Your vision (eye tracking) information shows that you spent {less/only a very brief time} time looking at this page. Can you tell me about that?

P4. Thinking about the questions that were presented following the ad, was there anything that stood out to you as confusing or anything that you did not understand?

Debriefing

Serenin is not a real product and it is not available for sale. The purpose of this research is to understand how people think about prescription drug information. In order to get an unbiased reaction to this information, we created a brand for this study. Please see your healthcare professional for questions about overactive bladder (OAB).

You have been very helpful. Thank you very much for your participation!
