1	ICR Reference No: 201502-0920-012 OMB Control No: 0920-0931 <a href="https://www.reginfo.gov/public/do/PRAView">https://www.reginfo.gov/public/do/PRAView</a>	5/31/2018  Time burden, total hours: 640  Attachment C HHLPPSS Variables - Final.doc  60 Day FRN  Supporting Statement A HHLPPSS V2 - Final.doc  Supporting Statement A HHLPPSS V2 - Final.doc	<b>The Healthy Homes Lead Poisoning Surveillance System (HHLPPSS)--- Extension without change of a currently approved collection</b>  Table7. Format for Adults with blood lead test  "The overarching goal of the Healthy Homes and Lead Poisoning Surveillance System (HHLPPSS) is to support healthy homes surveillance activities at the state and national levels. CDC is requesting a three-year extension of Office of Management and Budget (OMB) approval for up to 40 state and local Healthy Homes Childhood LeadPoisoning Prevention Programs (CLPPP) and the state-based Adult Blood Lead Epidemiology and Surveillance (ABLES) programs." page 65969  "The overarching goal of this information collection is to establish the HHLPPSS at the state and national levels. Currently, 40 state and local Childhood Lead Poisoning Prevention Programs (CLPPP) and the state-based Adult Blood Lead Epidemiology and Surveillance (ABLES) program sponsored by NIOSH will report information (e.g., presence of lead paint, age of housing, and occupation of adults) to the HHLPPSS. Linking these two systems through HHLPPSS ensures that CDC can identify and intervene for occupational exposures, so-called 'take home' exposures when workers bring lead contaminated clothing or equipment home and expose children and childhood lead exposure from lead paint, contaminated water, soil, dust or consumer products. The Program anticipates up to 40 state and local programs will participate in the HHLPPSS information collection over the next three years." page3/17  "Data will be collected quarterly on healthy homes and child blood lead levels by CDC. Adults blood lead levels will be sent to CDC on an annual basis. NIOSH will analyze adult blood lead data. " Page 13/17

 A\_Track Changes\_4182012 OIRA.DOC  
 (ABLES and CLPP are described)

"The overarching goal of this system is to establish Healthy Home Surveillance Systems at the state and national levels. Currently, 40 state and local Childhood Lead Poisoning Prevention Programs (CLPPP) and the state-based Adult Blood Lead Epidemiology and Surveillance (ABLES) program report information (e.g., presence of lead paint, age of housing, and occupation of adults) to the NBLSS. The addition of a new panel of housing questions would help to provide a more comprehensive picture of the potentially modifiable risk factors in much of the housing in the United States. Replacing NBLSS with HHLPSS instead of a modification is necessary because the scope and methods of data collection by the funded state and local programs can be much different (e.g., housing inspections vs. report of blood lead levels from a laboratory). Thus, the new surveillance system will be more comprehensive than the NBLSS. (See Part B)" Page 3-4/19.  
 "Upon approval of this new surveillance system, NBLSS (0920-0337, exp. 1/31/ 2012) will be discontinued because pertinent portions will be included in HHLPSS" Page 4/19.  
 "Overview of the Data Collection System  
 The primary purpose of HHLPSS is to improve program management and oversight. Currently, 40 state and local CLPPPs and the state-based ABLES program report information (e.g., presence of lead paint, age of housing, and occupation of adults) to the NBLSS." Page 4 of 19.
