**6. Other outcome and output data from administrative records and organizational documents (Secondary Data).**

Health care organizations will be asked to upload, to Abt Associates' secure file transfer program, any of the following documents the site has available, including draft versions, to track progress over the course of the project:

- Opioid prescribing policies
- Information about past or current projects related to opioid prescribing, including participation in local or state-based initiatives
- Quality improvement plans or projects around opioid prescribing
- Screenshots of dashboards and/or registries related to opioid prescribing
- Sample patient agreements
- Documented clinic workflows for managing patients on chronic opioids and data and tracking workflows
- Tracking and monitoring reports for patients on chronic opioids
- Training and education offerings (past, present, future)
- Care plan templates
- Patient education materials discussing risks and benefits of long-term opioid use
- Screening tools to identify patient opioid misuse
- Referral process between primary care and behavioral health providers
